REPORT.

TO THE RIGHT HONOURABLE
LORD PENTLAND,

His Majesty's Secretary for Scotland.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.,
EDINBURGH, August 4, 1909.

MY LORD,

My predecessor in office, Sir STAIR AGNEW, K.C.B., had the honour in 1908, in conformity with the requirements of the seventh section of the Scottish Registration Act, 17 and 18 Vict., cap. 80, to transmit to you, as His Majesty's Secretary for Scotland, General Abstracts of the Births, Deaths, and Marriages registered in Scotland during the year 1907, along with the usual Explanation and Commentary.

At the same time the Forty-third Annual Report on Vaccination was transmitted, in accordance with the nineteenth section of the Scottish Vaccination Act, 26 and 27 Vict., cap. 108.

I have now the honour to transmit the Detailed Annual Report, together with relative Tables, regarding the Births, Deaths, and Marriages registered in Scotland during the same year (1907).

I have the honour to be,

MY LORD,

Your most obedient Servant,

J. PATTEN MACDOUGALL,

Registrar-General.

REPORT TO THE REGISTRAR-GENERAL,

BY JAMES CRAUFURD DUNLOP, M.D., F.R.C.P. (EDIN.).

SIR,

I have the honour to submit the Detailed Report regarding the Births, Deaths, and Marriages registered in Scotland during the year ending 31st December 1907.*

The more salient features of the Scottish vital statistics of the year 1907 are a continued fall of the birth-rate, the birth-rate of the year being the lowest yet recorded; a marriage-rate of average amount; and a death-rate which, though slightly higher than those of the two previous years, 1905 and 1906, is less than those of all other previous years since the institution of national registration. The infantile mortality rate of 1907 was low; it is less than the corresponding rates of all years since 1879. The slight increase of the death-rate of this year over those of the two previous years may be ascribed to the existence of an epidemic in Scotland of cerebro-spinal meningitis. A full analysis of the deaths caused by that disease during the year is given in the report. Further attention is drawn to the continued approximation of the death-rate of the Principal Town Districts to the level of that of the Mainland-Rural Districts.

POPULATION.

The population of Scotland as enumerated on the Census day of 1901 was 4,472,103, of whom 2,173,755 were male and 2,298,348 were female. The population at the time of the previous Census, 1891, was 4,025,647, of whom 1,942,717 were male and 2,082,930 female. On the assumption that the rates of increase of the male and of the female populations which occurred in the intercensal period 1891 to 1901 have continued since the last Census, 1901, it is estimated that the population of Scotland at the middle of the year 1907 amounted to 4,776,063, of whom 2,331,907 were male and 2,444,156 were female. The estimated total population of Scotland

*The Detailed Annual Report is founded on information abstracted directly from the Duplicate Registers of Births, Deaths, and Marriages, which, after collation and examination, are transmitted to this Office by the District Examiners during the course of the year following that to which they are applicable. The abstracting of the various details cannot be completed, and the compilation of the Statistical Tables therefrom commenced, until the expiration of twelve months after the Registers are closed. The Report cannot therefore be issued sooner than eighteen months after the end of the year with which it deals.

at the middle of 1907 is 49,993 more than the estimated total population at the middle of 1906, the estimated male population being 26,057 greater, and the estimated female population being 23,936 greater.

For the purpose of these reports Scotland is divided into five groups of Registration Districts. The Principal Town Registration Districts consist of all towns which at the time of the last Census had a population of more than 30,000; the population of these districts at the middle of 1907 is estimated to have been 2,178,036, including 1,053,866 males and 1,124,170 females. The Large Town Registration Districts are those districts in Scotland which at the time of the last Census contained towns having a population of between 10,000 and 30,000; the population of these districts at the middle of 1907 is estimated to have been 602,799, including 296,141 males and 306,658 females. The Small Town Registration Districts are those districts which at the time of the last Census contained towns having a population of between 2000 and 10,000; the population of these districts at the middle of 1907 is estimated to have been 963,536, including 473,309 males and 490,227 females. The Mainland-Rural Registration Districts include all the registration districts, and parts of registration districts, on the mainland of Scotland, which are not in the above urban groups of districts; their population at the middle of 1907 is estimated to have been 919,034, including 455,103 males and 463,931 females. The Insular-Rural Districts consist of all registration districts in the insular portions of Scotland which are not included in the above groups of urban districts; their population at the middle of 1907 is estimated to have been 112,658, including 53,488 males and 59,170 females. Compared with the estimated populations of the previous year, those of each of the urban groups of districts show an increase, while those of each of the rural groups of districts show a decrease. The estimated population of the Principal Town Districts is 34,984 more than that of 1906, that of the Large Town Districts 6606 more, and that of the Small Town Districts 10,019 more; but that of the Mainland-Rural Districts is 984 less, and that of the Insular-Rural Districts 632 less.

TABLE I.—Population of Scotland, in its Five Groups of Districts, by the Censuses of 1891 and 1901, and estimated to the middle of 1907.

FIVE GROUPS OF DISTRICTS.	CENSUS 1891.			CENSUS 1901.			Estimated to 30th June 1907.

Principal Town	806,811	879,632	1,686,443	949,108	1,021,305	1,970,413	1,053,866	1,124,170	2,178,036
Large Town	236,914	252,693	489,607	273,843	286,671	560,514	296,141	306,658	602,799
Small Town	381,678	409,350	791,028	438,900	460,403	899,303	473,309	490,227	963,536
Mainland- Rural	459,664	475,512	935,176	456,852	463,352	920,204	455,103	463,931	919,034
Insular-Rural	57,650	65,743	123,393	55,052	61,617	116,669	53,488	59,170	112,658
SCOTLAND .	1,942,717	2,082,980	4,025,647	2,173,755	2,298,348	4,472,103	2,331,907	2,444,156	4,776,063

BIRTHS.

The births of 128,840 living children were registered in Scotland during the year 1907. These births are 3165 fewer than those registered in the previous year, 1906, 3522 less than the average number of births registered annually during the previous five years, 1902 to 1906, and 2747 less than the average number registered annually during the previous ten years, 1897 to 1906. The births registered during the year are fewer than those registered in any year since 1895. (*Table 1.*)

Of the total births of the year, 59,294, or 46 per cent., were registered in the Principal Town Districts; 18,346, or 14 per cent., in the Large Town Districts; 26,936, or 21 per cent., in the Small Town Districts; 22,046, or 17 per cent., in the Mainland-Rural Districts; and 2218, or 2 per cent., in the Insular-Rural Districts. Compared with the births of the previous year, 1906, those registered in the Principal Town Districts are 1189 fewer; those registered in the Large Town Districts 87 fewer, those registered in the Small Town Districts 716 fewer, those registered in the Mainland-Rural Districts 1079 fewer, and those registered in the Insular-Rural Districts 94 fewer. (*Table 2.*)

The birth-rate of the year per thousand of the estimated population was 26·98, a rate which is 0·95 less than that of the previous year, 1·63 less than the mean of the birth-rates of the previous five years, and 2·22 less than the mean of the birth-rates of the previous ten years. It is the first annual birth-rate of Scotland below 27 per thousand, and the second below 28 per thousand. Previous to 1894 the birth-rate was regularly over 30 per thousand, from 1894 to 1903 it was between 29·16 and 30·36, in 1904 it was 28·65, in 1905 28·10, in 1906 27·93, and in the year now under consideration, 1907, it declined further and was only 26·98. (*Table 1.*)

The national birth-rate of the year expressed as per thousand of the estimated number of women of child-bearing age, 15 to 45, amounted to 111·9, a rate which is 3·9 less than that of the previous year, and 6·5 less than the mean of the rates of the previous five years. In

TABLE II.—Birth-rate in Scotland and its Groups of Registration Districts in 1907.

GROUPS OF DISTRICTS.	Estimated Number of Women aged 15-45.	Births.	Birth-rate per 1000 of Population.		Birth-rate per 1000 Women aged 15-45.	
			Rate.	Relative Quantity, Scotland being = 100.	Rate.	Relative Quantity, Scotland being = 100.
SCOTLAND	1,151,156	128,840	26·98	100	111·9	100
Principal Town .	561,565	59,294	27·22	100·9	105·6	94·4
Large Town .	143,633	18,346	30·43	112·8	127·7	114·1
Small Town .	222,128	26,936	27·96	103·6	121·3	108·4
Mainland-Rural	199,518	22,046	23·99	88·9	110·5	98·7
Insular-Rural .	24,312	2,218	19·69	73·0	91·2	81·5

1902 this rate was 120·6, in 1903 it was 120·6, in 1904 it was 118·6, in 1905 it was 116·4, and in 1906 115·8.

The birth-rate per thousand of the estimated population in the Principal Town Districts was 27·22, which is 1·00 less than in the previous year; that in the Large Town Districts was 30·43, which is 0·49 less than in the previous year; that in the Small Town Districts was 27·96, which is 1·04 less than in the previous year; that in the Mainland-Rural Districts was 23·99, which is 1·15 less than in the previous year; and that of the Insular-Rural Districts 19·69, which is 0·72 less than in the previous year. There was thus a decline of the birth-rate in each of the groups of registration districts, the greatest decline being in the Mainland-Rural Districts, the smallest decline in the Large Town Districts. The birth-rates of the Principal and Small Town Districts, and of the Mainland and Insular-Rural Districts, are each the lowest recorded, and that of the Large Town Districts is the lowest recorded with only one exception, that of the year 1905, which was only 0·01 below the birth-rate of this year. The birth-rate of the Principal Town Districts fell for the first time below 28 per thousand; that of the Small Town Districts also fell for the first time below 28 per thousand; that of the Mainland-Rural Districts fell for the first time below 24 per thousand, and that of the Insular-Rural Districts fell for the first time below 20 per thousand. (*Table 3.*)

The birth-rate per thousand women of child-bearing age for the year ranged from 127·7 in the Large Town Districts, to 91·2 in the Insular-Rural Districts. In the Small Town Districts it was 121·3, in the Mainland-Rural Districts 110·5, and in the Principal Town Districts 105·6. Compared with the corresponding rates of the previous year, 1906, that of the Principal Town Districts shows a decline of 3·6, that of the Large Town Districts a decline of 2·0, that of the Small Town Districts a decline of 4·7, that of the Mainland-Rural Districts a decline of 5·2, and that of the Insular-Rural Districts a decline of 3·3.

The birth-rate of the year in the divisions of the counties ranged from 29·82 in the South-Western, to 20·61 in the Northern. In the West-Midland it was 28·23, in the North-Eastern 25·71, in the East-Midland 25·08, in the South-Eastern 24·49, in the Southern 21·74, and in the North-Western 20·67. With the exception of that of the West-Midland Division, each is less than the corresponding birth-rate of the previous year. (*Table 5.*)

The county birth-rates ranged from 33·24 in Dumbarton, 32·16 in Linlithgow, and 30·69 in Lanark, to 17·85 in Orkney, 18·39 in Peebles, 18·93 in Shetland, and 18·94 in Argyll. In three counties the birth-rate was over 30 per thousand, in seven counties it was between 25 and 30 per thousand, in seventeen counties it was between 20 and 25 per thousand, and in six counties it was less than 20 per thousand. In seven counties the birth-rate was higher in this than in the previous year, in twenty-six counties it was lower in this than in the previous year. The largest increases were in Nairn and Dumbarton, where the birth-rates shewed increases of 1·54 and 1·18 respectively; the largest declines were in Kinross, Peebles, and Haddington, where the declines were 4·73, 3·99, and 3·89 respectively. (*Table 5.*)

The birth-rate of the year in the principal towns ranged from 35·08 in Hamilton and 34·58 in Coatbridge, to 21·71 in Edinburgh and 22·63 in Perth. In Motherwell it was 32·41, in Govan 30·78, in Greenock 30·25, in Partick 29·89, in Glasgow 28·31, in Leith 27·57, in Dundee 27·39, in Paisley 26·20, in Kilmarnock 25·82, in Aberdeen 25·80, and in Kirkcaldy 24·85. The birth-rate in Perth is slightly higher than in the previous year, but in all the other principal towns it is lower. In five of these towns the birth-rate of the year was more than 30 per thousand, in seven it was between 25 and 30 per thousand, in three it was less than 25 per thousand. (*Table 4.*)

Of the total children whose births were registered during the year, 65,901 were male and 62,939 female. The birth-rate of male children per thousand of the estimated male population was 28·26, and of female children per thousand of the estimated female population 25·75. The former rate is 1·00 below that of the previous year; the latter is 0·92 below that of the previous year.

Among the children whose births were registered during the year the ratio of male to female children was as 104·7 to 100. In the previous year this ratio was 104·5 to 100. In the groups of registration districts the ratio of male children to each 100 female children ranged from 106·5 in the Large Town Districts, to 103·8 in the Small Town Districts. In the Principal Town Districts it was 104·8, in the Mainland-Rural Districts 104·2, and in the Insular-Rural Districts 104·2. In the previous year this ratio was highest in the Large Town Districts and lowest in the Principal Town Districts. (*Table 7.*)

Of the 128,840 children whose births were registered during the year, 120,049 were legitimate and 8791 illegitimate; the former are 2650 fewer than those of the previous year, and 3514 fewer than the average number during the previous five years; the latter are 515 fewer than in the previous year, and 8 fewer than the average number during the previous five years. (*Table 1.*)

The legitimate birth-rate per thousand of the estimated number of married women of between fifteen and forty-five was 248·3, a rate which is 8·0 less than that of the previous year, and the illegitimate birth-rate per thousand of the estimated number of unmarried and widowed women of between fifteen and forty-five was 13·2, a rate which is 0·9 less than that of the previous year. (*Table 6.*)

The legitimate birth-rate per thousand married women of between fifteen and forty-five in the counties varied from 310·2 in Caithness, 308·1 in Dumbarton, 285·5 in Linlithgow, 278·4 in Sutherland, and 275·1 in Stirling, to 198·3 in Peebles, 205·8 in Kirkcudbright, 210·7 in Selkirk, 213·5 in Edinburgh, and 216·2 in Berwick. In the principal towns this rate ranged from 290·1 in Hamilton, 287·9 in Coatbridge, and 270·9 in Greenock, to 193·4 in Edinburgh, 214·2 in Kilmarnock, and 216·7 in Aberdeen. (*Table 6.*)

The illegitimate birth-rate per thousand of the estimated number of unmarried and widowed women of between fifteen and forty-five was 13·2, a rate which is 0·9 less than that of the previous year, 0·7 less than that of 1905, and 0·7 less than that of 1904. In the divisions of the counties this rate ranged from 22·9 in the North-Eastern to 9·2 in the North-Western. In the Southern it was 14·5, in the South-Western 13·2, in the East-Midland 11·6, in the South-Eastern 10·8, in the West-Midland 10·6, and in the Northern 10·0. In the previous

year this rate was also highest in the North-Eastern and lowest in the North-Western. In the counties this rate ranged from 24·2 in Banff, 23·5 in Elgin, 23·3 in Aberdeen, and 20·2 in Wigtown, to 4·1 in Shetland, 6·2 in Ross and Cromarty, 7·8 in Orkney, and 7·9 in Sutherland. In the principal towns this rate ranged from 17·5 in Aberdeen and Hamilton and 15·3 in Dundee, to 8·9 in Paisley, 9·6 in Kirkcaldy, and 10·0 in Edinburgh. (*Table 6.*)

Illegitimate children constituted 6·82 per cent. of the total children whose births were registered during the year, an illegitimate rate which is 0·23 below that of the previous year, but is 0·17 above the mean of the corresponding rates of the previous five years, and 0·18 above the mean of the corresponding rates of the previous ten years. With the exception of the illegitimate rates of the years 1905 and 1906, that of this year is higher than all since 1897. (*Table 1.*)

The percentage of illegitimate children to the total registered during the year ranged from 8·84 in the Mainland-Rural Districts to 5·30 in the Large Town Districts. In the Principal Town Districts this rate was 6·98, in the Insular-Rural Districts 6·18, and in the Small Town Districts 5·93. In the Small Town Districts this rate was 0·30 less than in the previous year, in the Large Town Districts 0·28 less, in the Mainland-Rural Districts 0·24 less, and in the Principal Town Districts 0·16 less, but in the Insular-Rural Districts it was 0·30 more. (*Table 5.*)

TABLE III.—Births, 1907. Number of Legitimate, Illegitimate, and Total Births in Scotland and its Five Groups of Districts, distinguishing the Sexes; also the number of Twin and Triplet Births.

TABLE IV.—Births, 1907. Birth-rate per 1000 of Population; Percentage of Illegitimate to the Total Births; Proportion of Males to Females in the Legitimate, Illegitimate, and Total Births; and Proportion of Mothers who bore Twins and Triplets; in Scotland and its Five Groups of Districts, in 1907.

GROUPS OF DISTRICTS.	Births per 1000 of Population.	Percentage of Illegit. to Total Births.	Proportion of Males to every 100 Females in the			Proportion of MOTHERS who bore TWINS. — One in every	Proportion of MOTHERS who bore TRIPLETS. — One in every
			Total Births.	Legitimate Births.	Illegit. Births.		
Principal Town	27·22	6·98	104·8	105·1	100·3	78·6	9755·7
Large Town . .	30·43	5·30	106·5	106·4	109·0	70·1	18086·0
Small Town . .	27·96	5·93	103·8	103·9	101·6	75·7	8859·7
Mainland-Rural	23·99	8·84	104·2	103·6	110·8	76·6	10879·0
Insular-Rural .	19·69	6·18	104·2	104·4	101·5	57·3	2178·0
SCOTLAND . .	26·98	6·82	104·7	104·8	103·8	75·9	9779·6

In the divisions of the counties the illegitimate rate ranged from 12·35 in the North-Eastern and 10·60 in the Southern, to 4·96 in the West-Midland. In the East-Midland it was 7·08, in the South-Eastern 6·85, in the Northern 6·79, in the North-Western 6·48, and in the South-Western 5·74. In the North-Western, North-Eastern, and South-Eastern divisions this rate was higher than in the previous year, but in the other divisions of the counties it was lower than in that year. (*Table 5.*)

In the counties the illegitimate rate of the year ranged from 14·73 per cent. of the total births in Elgin, 12·65 in Wigtown, 12·53 in Aberdeen, 12·50 in Kirkcudbright, and 12·14 in Banff, to 3·42 in Shetland, 3·67 in Dumbarton, 4·28 in Ross and Cromarty, 4·32 in Linlithgow, and 4·53 in Renfrew. In eight of the counties this rate exceeded 10 per cent., in eighteen it was between 5 and 10 per cent., in seven it was less than 5 per cent. In fourteen counties this rate was more in this than in the previous year; in nineteen counties it was less in this than in the previous year. (*Table 5.*)

In the principal towns the illegitimate rate of the year ranged from 10·19 in Aberdeen, 9·80 in Dundee, and 8·39 in Edinburgh, to 3·30 in Motherwell, 3·64 in Coatbridge, and 3·67 in Govan. In Perth it was 7·73, in Glasgow 7·17, in Kilmarnock 6·37, in Kirkcaldy 5·74, in Paisley 5·34, in Greenock 4·87, in Leith 4·77, in Partick 4·62, and in Hamilton 4·54. In Edinburgh, Dundee, Aberdeen, Paisley, Leith, Kilmarnock, and Kirkcaldy this rate is higher than in the previous year, but in Glasgow, Govan, Greenock, Partick, Coatbridge, Perth, Hamilton, and Motherwell it is lower than in that year. The largest increase is that in Kirkcaldy, 1·30; the largest decrease is that in Hamilton, 1·76. (*Table 4.*)

Of the 128,840 living children whose births were registered during the year, 3352 were twins, 39 were triplets, and 4 were quadruplets. Thus of the children registered, 1 in every 38·4 was a twin, 1 in 3304 was a triplet, and 1 in 32,210 a quadruplet. Mothers of living children numbered 127,135; of them 125,445 gave birth to a single living child; 1676, or 1 in 75·9, to living twins; 13, or 1 in 9780, to triplet living children, and 1 to quadruplet living children. The quadruplet birth of living children is believed to be the fourth such event recorded since the institution of national registration in Scotland; the previous years in which such were registered were 1857, 1867, and 1903. (*Table 7.*)

The average number of births registered in Scotland daily during 1907 was 353, which average is 8 fewer than in the previous year. This average ranged from 395 in April to 325 in September. In May it was 378, in July 368, in June 365, in January 357, in October 352, in February 348, in March 345, in December 342, in August 332, and in November 328. In the previous year it was greatest in June, 386, and least in September, 335. (*Table 45.*)

The birth-rate of the year 1907 in England and Wales was 26·3, in Ireland 23·2, and in the United Kingdom 26·0. That in England and Wales is 0·7 below the Scottish rate, that in Ireland 3·8 below the Scottish rate, and that in the United Kingdom 1·0 below the Scottish rate.

The following are the birth-rates per thousand of the estimated populations in some European countries:—Roumania 41·7, Hungary

36·0, Prussia 33·0, Spain 32·9, Italy 31·4, Holland 30·0, Denmark 28·3, Switzerland 26·8, Norway 26·3, Sweden 25·5, France 19·7.

MARRIAGES.

Marriages registered in Scotland during the year 1907 numbered 33,298, a number which is 156 more than that of marriages registered in 1906, 1109 more than the average number of marriages registered annually in Scotland during the previous five years, and 1206 more than the average annual number registered during the previous ten years. It is the largest number of marriages registered in Scotland in any year since the institution of national registration, the previous largest being that of 1906, which was 33,142. (*Table 1.*)

The marriage-rate of the year is 6·97, a rate which is 0·04 below that of 1906, 0·15 less than the mean of the rates of the previous ten years, 1897 to 1906, but is 0·01 more than the mean of the rates of the previous five years, 1902 to 1906. (*Table 1.*)

Of the total marriages, 17,954, or 53·9 per cent., were registered in the Principal Town Districts; 4383, or 13·2 per cent., in the Large Town Districts; 6211, or 18·7 per cent., in the Small Town Districts; 4406, or 13·2 per cent., in the Mainland-Rural Districts; and 344, or 1·0 per cent., in the Insular-Rural Districts. Compared with the number of marriages registered in the previous year in these groups of districts, that of the Small Town Districts is 244 more, that of the Mainland-Rural Districts 24 more, and that of the Large Town Districts 14 more; but that of the Insular-Rural Districts is 10 less, and that of the Principal Town Districts is 116 less. The marriage-rate in these groups of districts ranged from 8·24 in the Principal Town Districts, to 3·05 in the Insular-Rural Districts. In the Large Town Districts it was 7·27, in the Small Town Districts 6·45, and in the Mainland-Rural Districts 4·79. Compared with the corresponding rate of the previous year, the marriage-rate of the Principal Town Districts for the year is 0·19 less, that of the Large Town Districts 0·06 less, and that of the Insular-Rural Districts 0·07 less; but that of the Small Town Districts is 0·19 more, and that of the Mainland-Rural Districts 0·03 more. (*Tables 2 and 3.*)

In the divisions of the counties the marriage-rate of the year ranged from 7·66 in the South-Eastern and 7·59 in the South-Western, to 4·10 in the North-Western and 4·20 in the Northern. In the East-Midland it was 6·75, in the North-Eastern 6·35, in the Southern 6·35, and in the West-Midland 5·82. In the Northern, North-Western, South-Western, and Southern Divisions the marriage-rate was lower in this than in the previous year, but in the North-Eastern, East-Midland, West-Midland, and South-Eastern it was higher than in that year. (*Table 5.*)

In the counties the marriage-rate of the year ranged from 8·13 in Edinburgh, 7·97 in Lanark, 7·75 in Selkirk, 7·22 in Forfar, and 7·18 in Aberdeen, to 2·08 in Sutherland, 3·84 in Bute, 3·93 in Argyll, and 3·94 in Ross and Cromarty. In four counties the marriage-rate was less than four per thousand, in six counties it was between four and five per thousand, in eight counties it was between five and six per thousand, in ten counties it was between six and seven per thousand, and in five counties it was over seven per thousand. (*Table 5.*)

In the principal towns the marriage-rate of the year ranged from 8·90 in Edinburgh and 8·84 in Glasgow, to 6·17 in Motherwell and 6·43 in Partick. In Aberdeen it was 8·44, in Perth 8·35, in Dundee 8·26, in Paisley 8·06, in Kilmarnock 7·75, in Kirkcaldy 7·64, in Hamilton 7·06, in Coatbridge 7·03, in Greenock 6·88, in Leith 6·54, and in Govan 6·49. The marriage-rates of Edinburgh, Aberdeen, Paisley, Perth, and Hamilton are higher than in the previous year, but the marriage-rates of the remaining principal towns are lower than in that year. (*Table 4.*)

Of the 33,298 marriages registered during the year, 29,684, or 89·23 per cent., were between bachelors and spinsters, 805, or 2·42 per cent., between bachelors and widows, 2042, or 6·14 per cent., between widowers and spinsters, and 735, or 2·21 per cent., between widowers and widows. Marriages between bachelors and spinsters are 127 more than in the previous year, and those between widowers and spinsters 56 more, but those between bachelors and widows are 2 fewer, and between widowers and widows 38 fewer. The number of bachelors married during the year is 125 more than in the previous year, the number of widowers married 18 more, and the number of spinsters married 183 more, but the number of widows married is 40 less. (*Tables 14 and 15.*)

The average age of all persons married during the year was 27·7, that of all men married was 29·0, and that of all women married 26·3. The latter two averages are the same as those of the years 1906 and 1905, but the first average is 0·1 more than the corresponding figures for those years.

The average age of men marrying during the year in the Principal Town Districts was 29·1, which is 0·1 more than in the previous year; that of men marrying in the Large Town Districts was 28·3, which is 0·1 less than in the previous year; that of men marrying in the Small Town Districts was 28·6, which is the same as in the previous year; that of men marrying in the Mainland-Rural Districts 29·4, which is 0·1 less than in the previous year; and that of men marrying in the Insular-Rural Districts 32·6, which is 2·1 less than in the previous year. The average age of bachelors marrying during the year was 27·7, of those who married spinsters 27·5, and of those who married widows 34·1; the first two of these averages are the same as in the previous year, but the third is 0·5 less. The average age of widowers marrying during the year was 43·0, of those marrying spinsters 41·4, and of those marrying widows 47·4; the average age of all these widowers is 0·4 less than in the previous year, of those marrying spinsters 0·4 less, and of those marrying widows 0·1 less.

The average age of all women marrying during the year in the Principal Town Districts was 26·5, which is 0·1 more than that of the previous year; the average age of those marrying in the Large Town Districts was 25·9, which is the same as in the previous year; of those marrying in the Small Town Districts 26·1, which is 0·1 more than in the previous year; of those marrying in the Mainland-Rural Districts 26·5, which is 0·1 less than in the previous year; and of those marrying in the Insular-Rural Districts 28·2, which is 1·2 less than in the previous year. The average age of all spinsters marrying during the year was 25·7, which is 0·1 more than in the previous year; of spinsters marrying bachelors 25·2, which is 0·1

more than in the previous year; and of spinsters marrying widowers 33·3, which is 0·3 less than in the previous year. The average age of all widows marrying during the year was 39·0, which is 0·1 more than in the previous year; of those marrying bachelors 35·5, which is the same as in the previous year; and of those marrying widowers 42·9, which is 0·4 more than in the previous year.

The youngest bachelors married during the year were 1 aged 16, 27 aged 17, 158 aged 18, and 580 aged 19, all of whom married spinsters, and 2 aged 19 who married widows. The oldest bachelors married during the year were 2 between 70 and 75, who married spinsters, and 1 aged between 75 and 80, who married a widow. The youngest widowers married during the year were 1 aged 20, and 35 aged between 21 and 25, all of whom married spinsters; and the oldest widowers married during the year were 21 between 70 and 80, who married spinsters, and 6 between 70 and 80, who married widows. (*Pp. 32-35.*)

The youngest spinsters married during the year were 8 aged 15, 65 aged 16, 353 aged 17, and 1052 aged 18, all of whom married bachelors, and 1 aged 16, 4 aged 17, 14 aged 18, and 20 aged 19, all of whom married widowers. The oldest spinsters married during the year were 4 aged between 65 and 70, and 1 aged 72, all of whom married bachelors; 10 between 60 and 65, and 2 between 65 and 70, all of whom married widowers. The youngest widows married during the year were 1 aged 19, and 3 aged 20, all of whom married bachelors, and 1 aged 20, who married a widower. (*Pp. 32-35.*)

Of all men marrying during the year, 2·31 per cent. were less than 20 years old, and 2·66 per cent. were more than 50 years old. Of the women marrying, 10·13 per cent. were less than 20 years old, and 0·93 per cent. were over 50 years old. The quinquennial age groups containing the largest number of bridegrooms were 20 to 25, which contained 31·92 per cent. of the bridegrooms, and 25 to 30, which contained 34·62 per cent. The quinquennial age groups containing the largest number of brides were those from 20 to 25, which contained 42·30 per cent. of the brides, and 25 to 30, which contained 28·26 per cent. A comparison of the age distribution of the marriages of the year with that of all marriages registered since the introduction of national registration shews that the proportion of the men married who were under 25 and over 40 is diminished, while the proportion between 25 and 40 is increased; the proportion of women married under 25, and between 40 and 45, is decreased, while that of women between 25 and 40, and over 45, is increased. (*Tables 12 and 13.*)

The tables on pages 30 to 35 of this Report are prepared for the purpose of shewing the relative ages of the brides and bridegrooms of the year. It may there be seen that the vast majority of the year's marriages were between men and women of similar age, but, as is usually the case, there have been marriages in which there were wide differences between the ages of the bride and bridegroom. Thus during the year 11 bachelors of between 30 and 35 were married to girls of between 15 and 17, and 7 bachelors of over 40 married to girls of between 17 and 19. There were 5 bachelors aged 20 and 1 aged 19 married to women of over 30. One bachelor aged 19 married a widow of over 35, and 4 aged between 30 and 40

married widows of between 55 and 65. Of the widowers married during the year there were 2 of over 40 who married spinsters of 19, 2 of over 50 who married spinsters of 17 and 18, and 1 of over 60 who married a spinster aged 18. One widower of over 65 married a widow of under 30, and one widower of over 75 married a widow of under 35. (*Pp. 32-35.*)

The number of marriages celebrated during the year according to the rites of the Established Church of Scotland was 15,116; they constituted 45·39 per cent. of the total marriages. They number 133 more than in the previous year, and the proportion they constitute of the total is 0·18 higher than in that year. Marriages celebrated according to the rites of the United Free Church numbered 8667, and constituted 26·03 per cent. of the total; their number is 33 more than in the previous year, the proportion they form of the total is 0·02 less than in that year. Roman Catholic Church marriages numbered 3536, and they constituted 10·62 per cent. of the total; their number is 108 less than in the previous year, and the proportion they formed of the total is 0·37 less. Marriages celebrated according to the rites of the Episcopal Church numbered 1005, and they constituted 3·02 per cent. of the total marriages of the year; they are 22 more than in the previous year, and the proportion they form of the total is 0·05 more. Marriages according to the rites of Churches of other denominations numbered 2750, and constituted 8·26 per cent. of the total; they are 163 fewer than in the previous year, and their proportion is 0·53 less. Irregular marriages numbered 2224, and constituted 6·68 per cent. of the total; they are 239 more than in the previous year, and the proportion they form of the total is 0·69 more. The number of irregular marriages registered during the year is greater than that in any year since the commencement of national registration; from 1855 to 1870 they were less than 100 per annum, from 1871 to 1880 they varied from 105 to 388, from 1881 to 1890 they varied from 419 to 1033, from 1891 to 1900 they varied between 1119 and 1914, from 1901 to 1906 they varied between 1862 and 2091, and this year increased to 2224. (*Tables 9 and 10.*)

Marriages celebrated according to the rites of the two principal Presbyterian Churches, the Established Church of Scotland and the United Free Church, numbered 23,783, and constituted 71·42 per cent. of the total; marriages celebrated according to the rites of all other churches numbered 7291, and constituted 21·90 per cent. of the total. The former are 166 more than in the previous year; the latter are 249 fewer than in that year. (*Tables 9 and 10.*)

Of the marriages registered during the year in the Principal Town Districts, 63·30 per cent. were celebrated according to the rites of one or other of the principal Presbyterian Churches, 24·99 per cent. according to the rites of other churches, and 11·71 per cent. were irregular. Of those registered in the Large Town Districts, 71·03 per cent. were celebrated according to the rites of one or other of the principal Presbyterian Churches, 27·17 per cent. according to the rites of other churches, and 1·80 per cent. were irregular. Of the marriages registered in the Small Town Districts, 80·55 per cent. were celebrated according to the rites of one or other of the principal Presbyterian Churches, 18·80 according to the rites of other churches, and 0·65 per

cent. were irregular. In the Mainland-Rural Districts 91·26 per cent. of the total were celebrated according to the rites of one or other of the principal Presbyterian Churches, 8·67 per cent. according to the rites of other churches, and 0·07 per cent. were irregular. Of the marriages registered in the Insular-Rural Districts, 81·39 per cent. were celebrated according to the rites of one or other of the principal Presbyterian Churches, 18·61 per cent. according to the rites of other churches, and there were no irregular marriages. The proportion of the total marriages celebrated according to the rites of the Established Church varied from 66·66 per cent. in the Mainland-Rural Districts, to 37·66 in the Principal Town Districts. The proportion of them according to the rites of the United Free Church varied from 37·50 per cent. in the Insular-Rural Districts, to 23·48 in the Large Town Districts. The proportion of them celebrated according to the rites of the Roman Catholic Church varied from 13·69 per cent. in the Large Town Districts, to 3·22 in the Mainland-Rural Districts. The proportion of the total marriages of the year celebrated according to the rites of the Episcopal Church varied from 3·92 per cent. in the Principal Town Districts, to 0 in the Insular-Rural Districts. The proportion of the total marriages celebrated according to the rites of other churches varied from 11·34 per cent. in the Insular-Rural Districts, to 4·54 in the Mainland-Rural Districts. Of the total marriages of the year, the proportion which irregular marriages constituted varied from 11·71 per cent. in the Principal Town Districts, to 0 in the Insular-Rural Districts and 0·07 in the Mainland-Rural Districts.

The counties in which Established Church marriages formed the largest percentages of the total marriages of the year were Kinross, 77·78, Kirkcudbright, 74·68, and Wigtown, 72·99, and the counties in which they formed the smallest percentages of the total were Ross and Cromarty, 29·06, Lanark, 36·56, Inverness, 37·53, and Renfrew, 37·53. The counties in which United Free Church marriages constituted the greatest percentages of the total were Orkney, 48·92, Berwick, 37·97, and Bute, 35·62, and the counties in which these marriages constituted the smallest percentages were Kinross, 19·44, Kirkcudbright, 20·17, and Argyll, 21·24. The counties in which

TABLE V.—Marriages, 1907. Number of Marriages contracted in Scotland and its Five Groups of Districts according to the Rites of the several Religious Denominations, and their Proportion to the Total Marriages in each Group.

Roman Catholic marriages constituted the largest percentages of the total were Dumbarton, 20·39, Lanark, 17·13, and Renfrew, 16·46; in nine counties no Roman Catholic Church marriages were registered during the year. The counties in which Episcopal Church marriages constituted the largest percentages of the total were Kincardine, 8·60, Forfar, 7·65, and Edinburgh, 5·99; in five counties no Episcopal Church marriages were registered. The frequency of irregular marriages in the counties varied from 14·29 per cent. in Edinburgh, 10·71 per cent. in Lanark, and 5·62 per cent. in Aberdeen, to 0 in ten counties. (*Table 8.*)

In the principal towns Established Church marriages were relatively most frequent in Kilmarnock, 51·18 per cent., and Leith, 51·01 per cent.; United Free Church marriages were relatively most frequent in Kirkcaldy, 34·00 per cent., and Perth, 33·68 per cent.; Roman Catholic Church marriages were relatively most frequent in Coatbridge, 30·41 per cent., and Hamilton, 20·00 per cent.; Episcopal Church marriages were relatively most frequent in Dundee, 10·15 per cent., and Edinburgh, 7·11 per cent. Marriages in Churches of other denominations were relatively most frequent in Paisley, 16·36 per cent., and in Partick, 14·77 per cent. Irregular marriages were relatively most frequent in Edinburgh, 19·53 per cent., and in Glasgow, 15·66 per cent. (*Table 8.*)

Of the 33,298 men whose marriages were registered during the year 1907, 32,860, or 98·68 per cent., signed the marriage schedules or registers by writing, and 438, or 1·32 per cent., by "mark." Of the women married during the year, 32,716, or 98·25 per cent., signed the marriage schedules or registers by writing, and 582, or 1·75 per cent., by "mark." The number of bridegrooms who signed by "mark" during the year was 43 fewer than in the previous year, 98 fewer than the average number so signing during the previous five years, and 150 fewer than the average number so signing during the previous ten years, and is the smallest number of such men in any year since the institution of national registration. The number of women married during the year who signed by "mark" is 71 fewer than in the previous year, 144 less than the average number so signing during the previous five years, and 246 less than the average number so signing during the previous ten years, and is also the smallest number of such recorded since the institution of national registration. Previous to 1876 illiterate men signing the marriage schedules or registers varied between 2697 and 2062; the number of such was for the first time below 2000 in 1876, for the first time below 1000 in 1891, and for the first time below 500 in 1906. Illiterate women in the years 1855 to 1876 varied between 4154 and 5427; the number of them for the first time fell below 4000 in 1877, for the first time below 3000 in 1884, for the first time below 2000 in 1888, for the first time below 1000 in 1898, and this year (1907) for the first time below 600. (*Tables 14 and 15.*)

The proportion of men using the "mark" during the year varied from 2·62 per cent. in the Insular-Rural Districts, to 0·70 per cent. in the Mainland-Rural Districts. In the Principal Town Districts this percentage was 1·44, in the Small Town Districts 1·43, and in the Large Town Districts 1·16. The proportion of women signing by "mark" varied from 5·81 per cent. in the Insular-Rural Districts, to

0·82 per cent. in the Mainland-Rural Districts. In the Small Town Districts it was 2·40, in the Principal Town Districts 1·73, and in the Large Town Districts 1·51. The percentage of men using the "mark" in the counties ranged from 4·55 in Sutherland, 3·04 in Ross and Cromarty, 2·74 in Inverness, and 2·37 in Lanark, to 0 in eleven counties. The percentage of women using the "mark" varied from 8·11 in Ross and Cromarty, 4·55 in Sutherland, 4·11 in Inverness, and 2·91 in Lanark, to 0 in nine counties. In seven counties, namely, Nairn, Banff, Kincardine, Kinross, Bute, Selkirk, and Kirkcudbright, all the marriage entries of the year were signed by writing. (*Table 16.*)

Of the 31,074 regular marriages registered during the year, 18,773 were preceded, in respect of both contracting parties, by proclamation of banns; 11,494 were, in respect of both parties, preceded by publication of notice under the provisions of the Marriage Notice (Scotland) Act, 1878; and 807 by proclamation of banns in respect of one spouse and publication of notice in respect of the other. Of the 2224 irregular marriages registered during the year, 2219 were registered on the authority of warrants by the Sheriff in terms of Lord Brougham's Act, 19 & 20 Vict. c. 96; 2 were registered, under the provisions of the 48th and 49th Sections of the Registration Act, 17 & 18 Vict. c. 80, upon the authority of extract decrees of declarator of marriage; and 3, under the provisions of the same enactment, upon the authority of extracts of conviction of having irregularly contracted marriage. (*Pp. 28 to 29.*)

The average number of marriages registered daily in Scotland during the year was 91. This average varied from 157 in June to 33 in May. In July it was 146, in December 128, in January 117, in April 104, in September 84, in October 68, in November 68, in February 63, in August 63, and in March 61.

The marriage-rate of the year in England and Wales was 7·91, in Ireland 5·14, and in the United Kingdom 7·53. The Scottish rate of the year is 0·94 less than the English rate, and 0·56 less than that of the United Kingdom, but is 1·83 more than the Irish rate.

The following are the 1907 marriage-rates in some European countries:—Roumania, 10·5; Hungary, 9·8; Prussia, 8·2; France, 8·0; Switzerland, 7·8; Italy, 7·7; Denmark, 7·6; Holland, 7·5; Spain, 6·9; Sweden, 6·2; and Norway, 6·0.

DEATHS.

Deaths registered in Scotland during the year 1907 numbered 77,296. They are 1661 more than in the previous year, 877 more than the average number registered during the previous five years, but 867 less than the average number registered during the previous ten years. Of the total deaths registered, 38,240 were of males and 39,056 of females; the former are 509 more than in the previous year, and the latter are 1152 more than in that year. (*Tables 1 and 17.*)

The Scottish death-rate of the year was 16·18, a rate which is 0·18 more than that of the previous year, but is 0·34 less than the mean of the death-rates of the previous five years, and 1·18 less than the mean of the death-rates of the previous ten years. The only Scottish death-rates which are lower than that of this year are those of 1905

and 1906. The death-rate of the male population was 16·40, and of the female population 15·98; the former is 0·04 above that of 1906, and the latter 0·32 above that of 1906. (*Tables 1 and 18.*)

Of the deaths registered during the year, 36,599, or 47·35 per cent., were registered in the Principal Town Districts; 10,039, or 12·99 per cent., in the Large Town Districts; 14,689, or 19·00 per cent., in the Small Town Districts; 14,147, or 18·30 per cent., in the Mainland-Rural Districts; and 1822, or 2·36 per cent., in the Insular-Rural Districts. The deaths registered in the Principal Town Districts are 1085 more than in the previous year, those in the Mainland-Rural Districts 264 more, those in the Small Town Districts 238 more, and those in the Insular-Rural Districts 91 more, but those registered in the Large Town Districts are 17 fewer than in the previous year. (*Table 2.*)

The death-rate of these groups of registration districts ranged from 16·80 in the Principal Town Districts to 15·24 in the Small Town Districts. In the Large Town Districts it was 16·65, in the Insular-Rural Districts 16·17, and in the Mainland-Rural Districts 15·39. Compared with the death-rates of the previous year, 1906, that of the Insular-Rural Districts is 0·89 more, that of the Mainland-Rural Districts 0·30 more, that of the Principal Town Districts 0·23 more, and that of the Small Town Districts 0·08 more, but that of the Large Town Districts is 0·22 less. (*Table 3.*)

The difference between the death-rate of the Principal Town Districts and that of the Mainland-Rural Districts is a matter to which in previous reports attention has been drawn. Previous to 1875 the mean of the death-rates of each quinquennial period of the Principal Town Districts was more than 10 per 1000 greater than the mean of the death-rates of the quinquennial periods of the Mainland-Rural Districts. In the quinquennial periods 1876 to 1880, and 1881 to 1885, this difference was between 7 and 8 per 1000, in the period 1886 to 1890 it was 5·25 per 1000, in the period 1891 to 1895 it was 4·66, in the period 1896 to 1900 it was 4·00, and in the period 1901 to 1905 it was 2·79. In the year 1906 it was 1·48, and in the year now under review, 1907, it was 1·41, which difference is less than that of all previous years. The approximation of the death-rate of the Principal Town Districts to that of the Mainland-

TABLE VI.—Showing Deaths and Death-rates in the Groups of Registration Districts in 1906 and 1907.

	1907.			1906.		
	Population.	Deaths.	Death-rate.	Population.	Deaths.	Death-rate.
Principal Town Districts,	2,178,036	36,599	16·80	2,143,052	35,514	16·57

Rural Districts bears testimony to the improvement which has taken place in the public health of these towns.

The death-rate in the divisions of the counties for the year ranged from 16·68 in the South-Western, to 14·79 in the North-Eastern. In the Northern it was 16·58, in the North-Western 16·53, in the Southern 16·44, in the West-Midland 15·98, in the East-Midland 15·96, and in the South-Eastern 15·78. In the West-Midland and Southern divisions of the counties the death-rate was less in this than in the previous year, but in the other six divisions of the counties it was greater in this than in the previous year. (*Table 5.*)

The death-rates of the counties ranged from 18·34 in Caithness, 17·91 in Sutherland, 17·48 in Forfar, 17·32 in Dumfries, and 17·29 in Kinross, to 11·37 in Peebles, 12·57 in Kincardine, 13·76 in Berwick, 13·80 in Orkney, and 13·90 in Linlithgow. In seven counties the death-rate was more than 17 per 1000, in ten counties it was between 16 and 17 per 1000, in five counties it was between 15 and 16 per 1000, in six counties it was between 14 and 15 per 1000, in three counties it was between 13 and 14 per 1000, and in two counties it was less than 13 per 1000. (*Table 5.*)

In the principal towns the death-rate of the year ranged from 19·13 in Dundee, and 18·47 in Glasgow, to 12·07 in Motherwell, and 12·44 in Partick. In Perth it was 17·90, in Greenock 17·79, in Leith 16·65, in Edinburgh 16·16, in Paisley 16·07, in Coatbridge 15·74, in Hamilton 14·55, in Aberdeen 14·35, in Kilmarnock 14·15, in Govan 13·69, and in Kirkcaldy 13·06. In Glasgow, Edinburgh, Govan, Paisley, Leith, Kirkcaldy, and Perth the death-rate of the year was more than that of the previous year, but in the remaining eight principal towns it was less than in the previous year. In four of these towns the death-rate of the year exceeded 17 per 1000, in three it was between 16 and 17 per 1000, in one it was between 15 and 16 per 1000, in three it was between 14 and 15 per 1000, and in four it was less than 14 per 1000. The death-rates of Aberdeen,

TABLE VIA.—Comparing Death-rates per 1000 in the Principal Town and the Mainland-Rural Districts of Scotland, 1855–1907.

PERIOD.	DEATH-RATE.		
	In Principal Town Districts.	In Mainland-Rural Districts.	Excess of Principal Town Rate over Mainland-Rural Rate.
1855-60	27·41	16·45	10·96
1861-65	28·54	17·27	11·27
1866-70	28·02	17·09	10·93
1871-75	28·00	17·48	10·52
1876-80	24·26	16·88	7·38
1881-85	23·01	15·79	7·22
1886-90	21·17	15·92	5·25
1891-95	21·19	16·53	4·66
1896-1900	19·97	15·97	4·00
1901-05	18·13	15·34	2·79
1906	16·57	15·09	1·48
1907	16·80	15·39	1·41

Partick, Coatbridge, Kilmarnock, Hamilton, and Motherwell are the lowest annual death-rates recorded for these towns in these Reports. Compared with the mean of the death-rates of the previous ten years, the death-rate of each of these principal towns is less, with the exception of that of Leith, which is of the same amount as that mean. (*Tables 4 and 21.*)

When the death-rates of the counties are made comparable by correction—that is, when the crude rates of the counties are adjusted to allow for the varying sex and age constitution of the population of the counties—it is found that the highest corrected death-rates are in Renfrew 19·81, Lanark 18·10, Dumbarton 17·44, Forfar 17·20, and Edinburgh 17·19, and that the lowest corrected death-rates are in Orkney 10·61, Peebles 11·06, Kincardine 11·35, Shetland 12·18, and Berwick 12·57. In six counties, Renfrew, Lanark, Dumbarton, Forfar, Edinburgh, and Selkirk, the corrected death-rate is greater than the national death-rate; in the remaining twenty-seven counties it is less than the national death-rate. (*Table 19.*)

The corrected death-rate of the principal towns ranged from 20·46 in Glasgow, and 20·16 in Dundee, to 13·32 in Motherwell, and 13·67 in Kirkcaldy. In Greenock it was 18·69, in Perth 17·96, in Leith 17·69, in Coatbridge 17·03, in Edinburgh 16·83, in Paisley 16·82, in Hamilton 15·27, in Govan 15·10, in Kilmarnock 15·01, in Aberdeen 14·25, and in Partick 13·72. In eight of these towns the corrected death-rate of the year is greater than the national death-rate; in seven of them it is less than the national death-rate. (*Table 19.*)

A study of the age distribution of those whose deaths were registered during the year shows that of the males 32·60 per cent. were less than five years old, 2·83 per cent. were between five and ten years old, 1·73 per cent. were between ten and fifteen years old, 2·47 per cent. were between fifteen and twenty years old, 5·87 per cent. were between twenty and thirty years old, 6·55 per cent. were between thirty and forty years old, 7·94 per cent. were between forty and fifty years old, 10·73 per cent. were between fifty and sixty years old, 12·83 per cent. were between sixty and seventy years old, and 16·43 per cent. were more than seventy years old. Of the females whose deaths were registered, 27·33 per cent. were less than five years old, 2·93 per cent. were between five and ten years old, 1·98 per cent. were between ten and fifteen years old, 2·39 per cent. were between fifteen and twenty years old, 5·79 per cent. were between twenty and thirty years old, 6·68 per cent. were between thirty and forty years old, 7·02 per cent. were between forty and fifty years old, 9·52 per cent. were between fifty and sixty years old, 13·51 per cent. were between sixty and seventy years old, and 22·85 per cent. were more than seventy years old. (*Table 24.*)

The death-rate per thousand of the estimated total male population was 16·40, which is 0·04 more than that of the previous year. The death-rate of the estimated male population of less than five years old was 43·30; of between five and ten years old, 4·05; of between ten and fifteen, 2·59; of between fifteen and twenty, 3·82; of between twenty and thirty, 5·34; of between thirty and forty, 8·24; of between forty and fifty, 12·91; of between fifty and sixty, 25·61; of between sixty and seventy, 49·42; of between seventy and eighty, 95·07; of between eighty and ninety, 186·03;

and of over ninety, 330·14. Compared with the corresponding rates of the previous year, the death-rates of males of under five, of between fifteen and thirty, of between sixty and seventy, and of ninety and over, are less, but those of the other age groups are more. (*Table 23.*)

The death-rate per thousand of the estimated female population was 15·98, which is 0·42 less than that of the male population, but 0·32 more than that of the female population in the previous year. The death-rate of the female population of less than five years old was 37·93 per thousand; of between five and ten years old, 4·42 per thousand; of between ten and fifteen, 3·15 per thousand; of between fifteen and twenty, 3·88 per thousand; of between twenty and thirty, 5·06 per thousand; of between thirty and forty, 7·93 per thousand; of between forty and fifty, 10·97 per thousand; of between fifty and sixty, 20·57 per thousand; of between sixty and seventy, 41·40 per thousand; of between seventy and eighty, 84·20 per thousand; of between eighty and ninety, 171·18 per thousand; and of over ninety, 311·90 per thousand. Compared with the corresponding rates of the previous year, those of the age groups between five and fifteen, between thirty and forty, and over fifty, are higher, while those of the remaining age groups are lower. (*Table 23.*)

A comparison of the female death-rates of the age groups with the corresponding male death-rates shows that the female death-rates between five and twenty are higher than the male death-rates, but that the death-rates of all the other female age groups are less than the corresponding male death-rates. A comparison between the male and female death-rates of the previous year brought out a similar result. (*Table 23.*)

A comparison of the age distribution of the deaths registered in the urban and rural districts shows that in the urban districts a larger proportion of the total deaths were of children of less than five years old than in the rural districts, while in the rural districts a larger proportion of deaths were of persons of over seventy than in the urban districts. Thus of the male deaths in the Principal Town Districts 37·97 per cent. were of children of less than five years old, and of those in the Large Town and Small Town Districts 34·70 and 31·64 per cent. were of children of that age, while in the Mainland-Rural Districts this proportion was 20·29, and in the Insular-Rural Districts 13·88. Similarly with the female deaths, the proportion of the total constituted by the deaths of children of less than five years old in the Principal Town Districts was 32·84 per cent., in the Large Town Districts 28·71 per cent., and in the Small Town Districts 25·92 per cent., while the corresponding proportions in the Mainland and Insular-Rural Districts were 16·10 per cent. and 10·29 per cent. Deaths of male persons of over seventy in the Insular-Rural Districts constituted 38·24 per cent. of the total male deaths, and in the Mainland-Rural Districts 29·34 per cent., while the corresponding percentages in the Principal, Large, and Small Town Districts were 10·01, 14·65, and 18·94. Deaths of females of over seventy in the Insular-Rural Districts constituted 47·84 per cent. of the total female deaths, and in the Mainland-Rural Districts 36·01 per cent., the corresponding percentages in the Principal, Large, and Small Town Districts being 15·77, 20·34, and 25·99 respectively. (*Table 24.*)

The death-rate per thousand of the estimated male population of over seventy years of age for the year was 114·62, and of the estimated female population 106·84. These rates are of some interest, because they may be taken as an indication of the probable mortality rate among old age pensioners. The male death-rate of over seventy in the Principal Town Districts was 116·73, in the Large Town Districts 130·19, in the Small Town Districts 115·25, in the Mainland-Rural Districts 115·93, and in the Insular-Rural Districts 106·84. The death-rate among the female population of over seventy in the Principal Town Districts was 104·77, in the Large Town Districts 115·27, in the Small Town Districts 112·05, in the Mainland-Rural Districts 108·95, and in the Insular-Rural Districts 102·36.

Deaths of infants of less than one year old registered during the year numbered 14,140; they are 1034 fewer than were registered in the previous year. The births of the year numbered 128,840 and thus the infantile mortality rate of the year was 109·7 per thousand births, a rate which is 5·3 less than that of the previous year, 7·3 less than the mean of the rates of the previous five years, and 14·9 less than the mean of the rates of the previous ten years. (*Tables 28 and 29.*)

The infantile mortality rate of the year in the Principal Town Districts was 125·2, in the Large Town Districts 108·9, in the Small Town Districts 102·6, in the Mainland-Rural Districts 82·2, and in the Insular-Rural Districts 63·6. The rates of the Principal, Large, and Small Town Districts, and of the Mainland-Rural Districts, are each lower in this than in the previous year, and are each the lowest recorded; that of the Insular-Rural Districts is more than that of the previous year, but less than those of all other years since the institution of national registration, the rates of 1901, 1892, and 1890 excepted. (*Tables 28 and 29.*)

In the divisions of the counties the infantile mortality rate ranged from 117·1 in the South-Western, to 75·5 in the Northern. In the South-Eastern it was 115·7, in the East-Midland 106·3, in the North-Eastern 104·5, in the West-Midland 91·9, in the Southern 90·6, and in the North-Western 83·7. In the counties the infantile mortality rate of the year ranged from 123·1 in Lanark, 122·8 in Forfar, and 121·1 in Edinburgh, to 48·6 in Orkney, 59·7 in Sutherland, 61·4 in Berwick, 64·3 in Peebles, and 67·3 in Wigtown. In three counties this rate was more than 120, in three counties it was between 110 and 120, in four counties it was between 100 and 110, in eight counties it was between 90 and 100, in seven counties it was between 80 and 90, in three counties it was between 70 and 80, and in five counties it was less than 70. The infantile mortality rates of the year in the counties of Stirling, Roxburgh, and Wigtown are the lowest yet recorded in these counties. (*Table 28.*)

In the principal towns the infantile mortality rate of the year ranged from 149·8 in Dundee, and 130·0 in Glasgow, to 88·0 in Kilmarnock, and 96·3 in Kirkcaldy. In Edinburgh it was 126·0, in Govan 123·3, in Aberdeen 122·8, in Paisley 120·9, in Leith 120·9, in Hamilton 115·6, in Coatbridge 115·3, in Partick 111·6, in Motherwell 111·6, in Perth 110·3, and in Greenock 104·4. In Edinburgh, Govan, Paisley, Leith, and Perth this rate was higher than in the previous year, but in the remaining ten principal towns

it was lower than in that year. The infantile mortality rates of Greenock and Kilmarnock are the lowest yet recorded for those towns. (*Table 28.*)

The infantile death-rate of the year of male children per thousand male births was 119·0, and of female children per thousand female births, 100·0. The former is 6·0 less than that of the previous year, and the latter 4·5 less than that of the previous year.

The average age of all persons whose deaths were registered during the year 1907 was 38·00, which average is 0·55 more than that of 1906. This average in the Principal Town Districts was 32·83, in the Large Town Districts 36·11, in the Small Town Districts 39·83, in the Mainland-Rural Districts 48·67, and in the Insular-Rural Districts 54·73.

The average age of all males whose deaths were registered during the year was 35·7, and of all females 40·3. The average age of males dying in the Principal Town Districts was 30·8, in the Large Town Districts 33·8, in the Small Town Districts 37·1, in the Mainland-Rural Districts 46·5, and in the Insular-Rural Districts 50·9. The average age of females dying in the Principal Town Districts was 34·9, in the Large Town Districts 38·4, in the Small Town Districts 42·4, in the Mainland-Rural Districts 50·8, and in the Insular-Rural Districts 58·1.

Among the deaths registered during the year were those of 17 reputed centenarians, 3 of whom were men and 14 women. Of them two men and seven women were stated to be aged 100, one woman to be aged 101, one man and three women to be aged 102, two women to be aged 103, and one woman to be aged 104.

The average number of deaths registered in Scotland daily throughout the year was 212. This average in February was 262, in January 254, in April 246, in March 239, in December 236, in May 223, in November 198, in June 194, in July 187, in October 178, in September 163, and in August 162. (*Table 45.*)

The death-rate of the United Kingdom for the year 1907 was 15·4, of England and Wales 15·0, and of Ireland 17·7. The Scottish death-rate of the year is thus 0·8 above that of the United Kingdom, 1·2 above that of England and Wales, but 1·5 below that of Ireland.

The following are the death-rates of the year 1907 in some European countries:—Roumania, 26·7; Hungary, 25·2; Spain, 24·0; Italy, 20·8; France, 20·2; Prussia, 17·8; Switzerland, 16·8; Sweden, 14·6; Holland, 14·6; Norway, 14·2; Denmark, 14·2.

CAUSES OF DEATH.

Of the 77,296 deaths registered during the year 1907, 75,500, or 97·7 per cent., were certified as to the cause of death by a registered medical practitioner or by a procurator-fiscal, while 1796, or 2·3 per cent., were not so certified. The uncertified deaths form the same percentage of the total deaths in this year as in the previous year, but that percentage is 0·2 less than the mean of the corresponding percentages of the previous five years. (*Table 40.*)

The proportion of deaths uncertified as to the cause of death varied from 27·1 per cent. in the Insular-Rural Districts to 0·8 per cent. in the Large Town Districts. In the Mainland-Rural Districts this per-

centage was 3·8, in the Principal Town Districts 1·4, and in the Small Town Districts 1·2. In the Principal and Small Town Districts this proportion is less than in the previous year, but in the other groups of districts it is greater. In the divisions of the counties this proportion ranged from 21·3 in the North-Western and 16·0 in the Northern, to 0·8 in the East-Midland and 1·0 in the North-Eastern and South-Western. In the counties this percentage varied from 25·9 in Sutherland, 25·2 in Ross and Cromarty, 22·0 in Shetland, 18·0 in Inverness, and 12·0 in Orkney, to 0 in Peebles and Selkirk, 0·2 in Berwick and Kincardine, and 0·3 in Roxburgh. In the principal towns this proportion varied from 4·3 in Paisley, 3·4 in Edinburgh, 1·7 in Greenock, and 1·1 in Glasgow, to 0 in Kirkcaldy and Perth, 0·2 in Aberdeen, Coatbridge, Kilmarnock, and Motherwell, and 0·4 in Hamilton. (*Table 40.*)

The cause of death was specified in 76,774 cases, information being supplied by a medical practitioner, by a procurator-fiscal, or by a relative or other informant, while in 522 cases it was not so specified. The latter are 19 fewer than in 1906, but 71 more than in 1905, and constitute 0·7 per cent. of the total deaths of the year.

In an endeavour to make the information on which this section of the Report is founded as satisfactory as possible, letters of enquiry addressed to medical certifiers have been freely used in cases in which the diseases causing death were insufficiently described. In all nearly 1200 replies were received, and the information in them enabled more than 850 deaths to be located under their proper headings in the classification of the causes of death. Among cases dealt with in this manner during the year there were 283 deaths from meningitis, of which by enquiry 43 were found to be deaths from cerebro-spinal meningitis and 139 to be deaths from tuberculous meningitis; 109 cases of tumour, of which 72 were found to be cases of cancer; 154 cases of intestinal obstruction, of which 61 were found to be due to cancer; 88 cases of syncope, of which 29 were found to be due to valvular or other diseases of the heart, and 31 due to diseases of other organs; 64 cases of old age in which the age stated in the registers appeared to be inconsistent with such a cause of death, of which 31 were found to be due to some well-defined disease, and of the remainder 21 were found to be cases in which the age of the persons had been understated in the registers; 18 cases of jaundice, of which 7 were found to be due to cancer.

Of the 76,774 deaths registered during the year from specified causes, 4087, or 5·3 per cent., were certified as due to diseases of the nervous system, apoplexies excluded; 13,377, or 17·4 per cent., to diseases of the circulatory system, apoplexies included; 5999, or 7·8 per cent., to diseases of the respiratory system, pneumonia excluded; 4515, or 5·9 per cent., to diseases of the digestive system, diarrhoeas excluded; 2823, or 3·7 per cent., to diseases of the urinary system; 238, or 0·3 per cent., to diseases of the reproductive system; 451, or 0·6 per cent., to diseases and accidents of pregnancy and parturition, puerperal septic conditions excluded; and 3123, or 4·1 per cent., to violent causes. (*Tables 31 and 32.*)

There was only one death registered during the year as due to small-pox; in the previous year (1906) there also was only one such death, in 1905 there were four. The solitary death from small-pox was

registered in Leith, and was that of a sailor who contracted the infection in a foreign country. (*Tables 31 and 35.*)

"Fevers," including typhus, enteric, relapsing, cerebro-spinal, and ill-defined fevers, were the ascribed cause of 2121 deaths during the year, which is 1402 more than in the previous year, and 1690 more than in the year 1905. The increased number of these deaths is attributable to an epidemic of cerebro-spinal meningitis which occurred during the year, and which was accountable for 1732 deaths. (*Tables 31 and 35.*)

Deaths from typhus fever numbered 14; they are 4 more than in the previous year, but 6 less than the average number in the previous five years. (*Tables 31 and 35.*)

Deaths from enteric fever numbered 367; they are 33 fewer than were registered in 1906, 90 fewer than the average number registered annually during the previous five years, and are the smallest number registered in any year since the institution of national registration. The death-rate from this cause amounted to 8 per 100,000, a rate which varied from 15 in the Large Town Districts to 5 in the Mainland-Rural Districts; in the Insular-Rural Districts it was 8, in the Principal Town Districts 7, and in the Small Town Districts 6. In the principal towns this rate ranged from 12 in Glasgow, 11 in Greenock, and 10 in Coatbridge, to 0 in Perth and Motherwell and 1 in Govan and Partick. Of the deaths from enteric fever, 4·4 per cent. were of children of less than five years old, 7·1 per cent. were of children of between five and ten years old, 10·1 per cent. were of children of between ten and fifteen, 75·5 per cent. were of persons of between fifteen and sixty, and 3 per cent. were of persons of over sixty. (*Tables 30-35.*)

Deaths from measles numbered 1153; they are 292 fewer than in 1906, and 275 less than the average number of such deaths during the previous five years. The death-rate from measles amounted to 24 per 100,000, a rate which is 7 less than in the previous year, and the same

TABLE VII.—Deaths from Small-pox in Scotland, 1855-1907.

YEAR.	Small-pox Deaths.	YEAR.	Small-pox Deaths.	YEAR.	Small-pox Deaths.
1855	1,309	1873	1,126	1891	—
1856	1,306	1874	1,246	1892	11
1857	845	1875	76	1893	68
1858	332	1876	39	1894	129
1859	682	1877	38	1895	47
1860	1,495	1878	4	1896	2
1861	766	1879	8	1897	10
1862	426	1880	10	1898	2
1863	1,648	1881	19	1899	1
1864	1,741	1882	3	1900	53
1865	383	1883	11	1901	278
1866	200	1884	14	1902	80
1867	100	1885	39	1903	41
1868	15	1886	24	1904	185
1869	64	1887	17	1905	4
1870	114	1888	3	1906	1
1871	1,442	1889	8	1907	1
1872	2,448	1890	—		

amount less than the mean of the rates of the previous five years. The death-rate from measles in the Principal Town Districts was 40 per 100,000, in the Large Town Districts 15, in the Small Town Districts 13, in the Mainland-Rural Districts 6, and in the Insular-Rural Districts 4. In the principal towns this rate ranged from 85 in Dundee, 64 in Govan and in Motherwell, 55 in Partick, and 48 in Glasgow, to 0 in Kilmarnock, 3 in Hamilton, and 10 in Coatbridge. Of those dying from measles during the year, 91·8 per cent. were less than five years old, 6·2 per cent. were between five and ten years old, and 2 per cent. were over ten years old. (*Tables 30-36.*)

Deaths from scarlet fever registered during the year numbered 233; they are 3 more than in the previous year, but 97 fewer than the average number registered annually during the previous five years. The death-rate from scarlet fever was 5 per 100,000, a rate which is the same as in the previous year, but 2 less than the mean of the corresponding rates of the previous five years. This death-rate in the Large Town Districts was 8 per 100,000, in the Insular-Rural Districts 6, in the Principal Town Districts 5, in the Small Town Districts 3, and in the Mainland-Rural Districts 3. In the principal towns this rate ranged from 13 in Kilmarnock, and 11 in Greenock, to 0 in Govan, Partick, Coatbridge, and Perth. Of those dying from scarlet fever, 66·5 per cent. were less than five years old, 21·5 per cent. were between five and ten years old, and 12 per cent. were over ten years old. (*Tables 30-36.*)

TABLE VIII.—Deaths from “Fevers” in Scotland in 1907, with the equivalent Death-rates therefrom.

FEVERS.	RURAL DISTRICTS.		TOWN DISTRICTS.	
	Deaths from each Fever.	Death-rate per 100,000 of the Population.	Deaths from each Fever.	Death-rate per 100,000 of the Population.

TABLE IX.—Monthly Deaths from “Fever” in Eight of the Principal Towns of Scotland during the Ten Years 1898-1907; specifying those from Typhus and from Enteric Fever.

MONTHS.	Total “Fever” Deaths.	Typhus.	Enteric.	MONTHS.	Total “Fever” Deaths.	Typhus.	Enteric.
January	267	11	178	July	257	9	157
February	344	21	176	August	281	7	199
March	351	16	152	September	339	8	269
April	337	14	143	October	348	12	286
May	284	11	122	November	300	13	234
June	242	12	118	December	274	20	209

Deaths registered during the year as due to diphtheria numbered 674, and those due to croup numbered 55; the former are 127 fewer than in the previous year, the latter are 6 fewer. Deaths from diphtheria and croup combined numbered 729; they are 133 fewer than in the previous year, and 38 fewer than the average number of such deaths registered annually during the previous five years. The death-rate from these causes amounted to 15 per 100,000, a rate which is 3 less than that of 1906, and 2 less than the mean of the rates of the previous five years. This death-rate in the Large Town Districts was 19, in the Principal Town Districts 16, in the Small Town Districts 14, in the Mainland-Rural Districts 13, and in the Insular-Rural Districts 9. In the principal towns this rate ranged from 48 in Paisley, 36 in Motherwell, and 26 in Hamilton, to 2 in Govan and 11 in Kilmarnock. Of those whose deaths were registered during the year as due to diphtheria or to croup, 72·2 per cent. were less than five years old, 21·8 per cent. were between five and ten years old, and 6·0 per cent. were more than ten years old. (*Tables 30-36.*)

Deaths from hooping-cough registered during the year numbered 2485; they are 1122 more than those registered in 1906, and 541 more than the average number registered during the previous five years. The death-rate from this cause amounted to 52 per 100,000, a rate which is 23 more than that of 1906, and 10 more than the mean of the death-rates from this cause during the previous five years. The death-rate from hooping-cough varied from 76 per 100,000 in the Principal Town Districts to 8 per 100,000 in the Insular-Rural Districts. In the Large Town Districts it was 48, in the Small Town Districts 36, and in the Mainland-Rural Districts 22. In the principal towns this rate ranged from 120 in Partick, 106 in Glasgow, and 98 in Hamilton, to 5 in Kilmarnock, 29 in Coatbridge, and 33 in Kirkcaldy. Of those whose deaths were registered as due to hooping-cough during the year, 96·9 per cent. were less than five years old, 3·0 per cent. were between five and ten years old, and 0·1 per cent. were over ten years old. (*Tables 30-36.*)

Deaths from diarrhœas, including those registered as due to diarrhœa, to dysentery, to enteritis, to infective enteritis, and to gastro-enteritis, numbered 2177; they are 1168 fewer than in 1906, and 791 less than the average number of such deaths registered annually in the previous five years. The death-rate from these causes was 46 per 100,000, a rate which is 25 less than that of the previous year, and 18 less than the mean of the corresponding rates of the previous five years. The death-rate from diarrhœas in the Principal Town Districts was 49, in the Small Town Districts 48, in the Large Town Districts 46, in the Mainland-Rural Districts 37, and in the Insular-Rural Districts 27. In the principal towns this death-rate ranged from 89 in Dundee, 85 in Motherwell, and 84 in Coatbridge, to 31 in Edinburgh, 33 in Paisley, 35 in Partick, and 36 in Govan. Of those dying from these diseases, 76·2 per cent. were less than five years old, 11·8 per cent. between five and sixty years old, and 12 per cent. were more than sixty years old. (*Tables 30-36.*)

Deaths registered during the year as due to cerebro-spinal meningitis numbered 1732; in 1905 there were 2 such deaths, and in 1906 there were 301 such deaths. Of these deaths 1189 were registered in the Principal Town Districts, 264 in the Large Town

Districts, 184 in the Small Town Districts, 93 in the Mainland-Rural Districts, and 2 in the Insular-Rural Districts. Of these deaths 106 were registered in January, 218 in February, 285 in March, 305 in April, 253 in May, 164 in June, 119 in July, 76 in August, 77 in September, 46 in October, 46 in November, and 37 in December. Of them 910 were of males and 822 of females. The death-rate from cerebro-spinal meningitis for the year was 37 per 100,000, a rate which in the Principal Town Districts was 55, in the Large Town Districts 44, in the Small Town Districts 19, in the Mainland-Rural Districts 10, and in the Insular-Rural Districts 2. In the principal towns this death-rate ranged from 106 in Leith, 85 in Glasgow, 76 in Motherwell, and 68 in Govan, to 2 in Aberdeen, 3 in Perth, 11 in Greenock, and 15 in Kirkcaldy. Of those whose deaths were ascribed to this cause, 50·0 per cent. were under five years old, 19·7 per cent. were between five and ten years old, 9·4 per cent. were between ten and fifteen years old, 20·4 per cent. were between fifteen and sixty, and 0·5 per cent. were over sixty. (*Tables 30-33a and 37a.*)

Influenza was certified as the primary cause of death in 425 cases during the year, and as a secondary cause in 758 cases, the total being 1183. That total is 421 more than in the previous year. These deaths were most frequent in February, January, and March, when they numbered 278, 229, and 213 respectively, and least frequent in August, September, and June, when they numbered 21, 22, and 26 respectively. Deaths of which influenza was the primary cause are 112 more than in the previous year, and the total deaths from influenza are 421 more than in that year. (*Table 37.*)

Deaths from diseases and accidents of pregnancy and parturition, including those certified as due to puerperal septic conditions, numbered 686. They include 235 deaths from puerperal septic conditions, 91 deaths from placenta prævia or flooding, 89 from puerperal convulsions, and 271 from other diseases and accidents of pregnancy and childbirth, including abortion and puerperal mania. There were 128,840 births registered during the year, and thus the death-rate from these causes amounted to 5·3 per thousand births, a rate which is 0·1 less than that of last year. This rate ranged from 6·3 in the Insular-Rural Districts, and 6·1 in the Mainland-Rural Districts, to 4·3 in the Small Town Districts. In the Principal Town Districts it was 5·6, and in the Large Town Districts 5·1. In the principal towns this rate ranged from 11·4 per thousand births in Perth, 10·1 in Kilmarnock, and 8·2 in Coatbridge, to 2·2 in Leith, 3·0 in Govan, and 3·4 in Paisley. (*Table 31.*)

Deaths ascribed to tuberculous disease during the year numbered 10,070; they are 71 more than in 1906, and 262 more than the average number during the previous five years. Of these deaths 6415 were ascribed to phthisis, 1643 to tuberculous meningitis, 983 to tuberculous peritonitis or tabes, and 1029 to other tuberculous disease. Compared with the returns of the previous year, deaths from phthisis are 76 fewer, those from tuberculous peritonitis 74 fewer, and those from other tuberculous disease 18 fewer, but those from tuberculous meningitis are 239 more. The death-rate of the year from tuberculosis amounted to 212 per 100,000, a rate which is 1 less than that of 1906, and 1 less than the mean of the rates of the previous five years. The death-rate from tuberculous diseases ranged

from 235 in the Large Town Districts, and 228 in the Principal Town Districts, to 185 in the Mainland-Rural Districts. In the Insular-Rural Districts it was 203, and in the Small Town Districts 189. This death-rate in the principal towns varied from 284 in Coatbridge, 278 in Dundee, 263 in Greenock, 258 in Perth, and 257 in Glasgow, to 140 in Motherwell, 152 in Partick, and 157 in Hamilton. Of those dying from tuberculous disease during the year, 22·5 per cent. were less than five years old, 6·0 per cent. were between five and ten years old, 5·4 per cent. were between ten and fifteen, 62·3 per cent. were between fifteen and sixty, and 3·8 per cent. were over sixty. Of those dying from tubercle, 5088 were male and 4982 female. The death-rate from tubercle in the male population was 220, and in the female 205. (*Tables 30-36.*)

The death-rate from phthisis was 135 per 100,000, a rate which is 3 less than in the previous year, and 8 less than the mean of the rates of the previous five years, and which varied from 158 in the Insular-Rural Districts to 123 in the Small Town Districts. In the Large Town Districts it was 144, in the Principal Town Districts 137, and in the Mainland-Rural Districts 135. In the principal towns this rate ranged from 177 in Dundee, 163 in Perth, and 161 in Coatbridge, to 75 in Hamilton, 80 in Partick, 83 in Motherwell, and 87 in Kirkcaldy. (*Tables 31-36.*)

Deaths ascribed to malignant disease numbered 4551, a number which is 42 more than in the previous year, and 537 more than the average annual number during the previous five years. Of the persons dying from these diseases, 1786 were male and 2765 female. Of these deaths, 2357 were ascribed to carcinoma, 237 to sarcoma, and 1957 to other or unspecified forms of cancer. The death-rate from malignant disease amounted to 96 per 100,000, a rate which is the same as that of 1906, but 9 more than the mean of the death-rates from malignant disease of the previous five years. This death-rate ranged from 113 per 100,000 in the Insular-Rural Districts, to 86 in the Large Town Districts; in the Mainland-Rural Districts it was 103, in the Principal Town Districts 97, and in the Small Town Districts 91. This death-rate in the principal towns ranged from 131 in Edinburgh, 116 in Aberdeen, and 112 in Dundee, to 44 in Hamilton, 46 in Govan, 49 in Motherwell, and 51 in Coatbridge. The death-rate from malignant disease in the male population was 77, and in the female population 114; in the previous year the male death-rate from these causes was 78, and the female 113. Of those whose deaths were registered as due to malignant disease, 0·7 per cent. were less than twenty years old, 6·2 per cent. were between twenty and forty years old, 37·2 per cent. were between forty and sixty years old, and 55·9 per cent. were over sixty. Of the 1786 male deaths from malignant disease, 478, or 26·8 per cent., were due to malignant disease of the stomach; 346, or 19·4 per cent., to malignant disease of the intestines or rectum; and 170, or 9·5 per cent., to malignant disease of the liver. Of the 2765 female deaths from these diseases, 547, or 19·8 per cent. were due to malignant disease of the stomach; 453, or 16·4 per cent., to malignant disease of the intestine and rectum; 441, or 15·9 per cent., to malignant disease of the uterus; 367, or 13·3 per cent., to malignant disease of the breast; and 327, or 11·8 per cent., to malignant disease of the liver. (*Tables 31-36 and 38.*)

Deaths from pneumonia numbered 6934; they are 542 more than in 1906, and 234 more than the average annual number during the previous five years. The death-rate from this cause amounted to 146 per 100,000, which rate is 10 more than that of 1906, but is the same as the mean of the corresponding death-rates of the previous five years. In the Principal Town Districts this rate was 172 per 100,000, in the Large Town Districts 150, in the Insular-Rural Districts 132, in the Small Town Districts 122, and in the Mainland-Rural Districts 110. In the principal towns this death-rate ranged from 211 in Glasgow, 186 in Govan, 183 in Greenock, and 183 in Hamilton, to 109 in Perth, 110 in Kirkcaldy, and 117 in Motherwell. Of those dying from pneumonia, 45·4 per cent. were less than five years old, 2·0 per cent. were between five and ten years old, 1·1 per cent. between ten and fifteen years old, 29·3 per cent. between fifteen and sixty, and 22·2 per cent. were over sixty. The death-rate from pneumonia in the male population was 168 per 100,000, and in the female population 125. (*Tables 30-36.*)

Deaths from bronchitis numbered 5167; they are 437 more than in the previous year, but 185 less than the average number registered during the previous five years. The death-rate from bronchitis was 109 per 100,000, a rate which is 8 more than that of 1906, but 8 less than the mean of the rates of the previous five years. The death-rate from bronchitis in the Principal Town Districts was 120, in the Large Town Districts 114, in the Small Town Districts 97, in the Mainland-Rural Districts 94, and in the Insular-Rural Districts 91. In the principal towns this death-rate ranged from 175 in Dundee, 163 in Paisley, and 149 in Govan, to 49 in Kirkcaldy, 66 in Motherwell, 80 in Kilmarnock, and 89 in Edinburgh. Of those dying from bronchitis 28·3 per cent. were less than five years old, 0·5 per cent. were between five and ten, 0·2 per cent. between ten and fifteen, 18·0 per cent. between fifteen and sixty, and 53·0 per cent. were over sixty. The male death-rate from bronchitis was 102 per 100,000, and the female death-rate from bronchitis 116. (*Tables 30-36.*)

Deaths from pneumonia and bronchitis combined numbered 12,101; they are 979 more than the deaths from those diseases in the previous year, and 49 more than the average number of deaths registered as due to those diseases in the previous five years. The death-rate from these causes combined amounted to 255 per 100,000, a rate which is 18 more than the corresponding rate of the previous year, but 8 less than the mean of the corresponding rates of the previous five years. (*Tables 35 and 36.*)

Diseases of the heart were the ascribed cause of 8075 deaths, which is 24 more than in the previous year; those of the blood vessels, apoplexies excluded, were the ascribed cause of 621 deaths, which is 43 more than in the previous year; nephritis and Bright's disease were the ascribed cause of 2283 deaths, which is 450 more than in the previous year. (*Table 31.*)

Anæmia was the cause of 434 deaths, which is 22 fewer than in the previous year; diabetes was the cause of 400 deaths, which is 52 more than in the previous year; syphilis of 226 deaths, which is 19 fewer than in the previous year; and rheumatism and gout of 569 deaths, which is 2 fewer than in the previous year, 112 of them being

caused by acute rheumatism, 202 by rheumatism of the heart, 247 by chronic rheumatism, and 8 by gout.

Premature birth was the ascribed cause of 2232 deaths, which is 138 fewer than in the previous year; congenital defects of 701, which is 80 more than in the previous year; and injury at birth of 153 deaths, which is 11 fewer than in the previous year.

To violent causes the deaths of 3123 persons were ascribed, of whom 2222 were male and 901 female. These deaths are 63 more than in the previous year, and 75 more than the average number of such deaths registered annually during the previous five years. The male deaths from violence are 14 more than in the previous year, and the female deaths from violence 49 more than in the previous year. The death-rate from violent causes amounted to 66 per 100,000, a rate which is 1 more than that of the previous year, but is the same as the mean of the corresponding rates of the previous five years. The death-rate from violent causes in the male population was 96 per 100,000, and in the female population 37 per 100,000. The death-rate from violence in the Insular-Rural Districts was 77 per 100,000, in the Mainland-Rural Districts 69, in the Principal Town Districts 67, in the Large Town Districts 65, and in the Small Town Districts 59. In the principal towns this death-rate ranged from 113 in Coatbridge, 80 in Glasgow, and 75 in Dundee, to 20 in Partick, 29 in Motherwell, and 34 in Govan. (*Tables 31-36.*)

Of the deaths from violence, 2836 were ascribed to accident, 274 to suicide, and 13 to homicide. There were no deaths by execution.

Among the deaths from accidents, 539 were ascribed to drowning, which is 1 more than in the previous year; 383 to burning, which is 5 more than in the previous year; 355 to accidents connected with horses and vehicles, which is 27 more than in the previous year; 191 to falls, which is 32 fewer than in the previous year; 203 to accidents in mines and quarries, which is 50 more than in the previous year; 135 to overlaying, which is 4 more than in the previous year; 163 to other forms of suffocation, which is 16 more than in the previous year; 86 to poisoning, which is 18 fewer than in the previous year; 86 to weather agencies, which is 20 more than in the previous year; 49 to accidents with machinery, which is 1 less than in the previous year; 39 to accidents on ships, on boats, or in docks, which is 1 less than in the previous year; 11 to accidents with weapons and implements, which is 1 less than in the previous year; and 596 to other or unspecified accidents, which is 14 less than in the previous year.

Of the accidental deaths connected with vehicles and horses, 208 were connected with railway vehicles, 131 with other vehicles, and 16 with horses.

Of the accidental deaths in mines and quarries, 180 were in coal mines, 15 in other mines, and 8 in quarries.

Of the accidental deaths from poisons or poisonous vapours, 32 were due to opium or one or other of its preparations; 10 to coal gas; 7 to carbolic acid; 4 to chloroform; 4 to aconite, belladonna, and chloroform liniment; 3 each to strychnine and ammonia; 2 each to phosphorus, caustic potash, hydrochloric acid, alcohol, and carbonic oxide; and 1 each to "irritating fumes," belladonna, oxalic acid, "irritant poisoning," prussic acid, corrosive sublimate, sulphuric

acid, laburnum, corrosive poison, nitrate of mercury, paraldehyde, vermin killer, and to unstated poison.

In addition to the above 86 deaths from accidental poisoning, there were 22 deaths in which the administration of an anæsthetic was a secondary or contributing cause; in 16 of these cases chloroform was the anæsthetic used, in 1 chloroform and ether, in 1 ethyl chloride and ether, in 1 cocaine, and in 3 the kind of anæsthetic was not stated.

Among the male deaths from suicide there were 71 by hanging, 54 by cutting, 22 by drowning, 21 by gunshot, 16 by poisoning, 10 on railways, 6 by precipitation, and 3 by other or unstated means. Among the female deaths from suicide there were 20 by hanging, 20 by drowning, 12 by cutting, 12 by poisoning, 2 by precipitation, 1 on a railway, and 4 by other or unstated means. Among the suicidal deaths by poisoning there were 5 by opium and its preparations, 4 by carbolic acid, 3 each by prussic acid, coal gas, and oxalic acid, and 1 each by aconite, belladonna and chloroform liniment, iodine, hydrochloric acid, belladonna, phosphorus, ammonia, mercury, benzine, strychnine, and corrosive sublimate. (*Table 39.*)

The comparative prevalence of some of the more frequent causes of death expressed as their proportion to each 10,000 specified causes of death was as follows:—Tubercle, 1312; heart disease, including syncope, 1052; pneumonia, 903; bronchitis, 673; apoplexy, 610; malignant disease, 593; violence, 407; whooping-cough, 324; diarrhœas, 283; cerebro-spinal meningitis, 226; Bright's disease, 205; measles, 150; cerebritis and meningitis (not stated to be tuberculous or cerebro-spinal), 120; diphtheria, 88; rheumatism, 73; influenza, 55; enteric fever, 48. (*Table 32.*)

WEATHER AND ITS INFLUENCE ON THE MORTALITY.

The following remarks on the weather of the year are the Notes made by the late Dr. Buchan and Mr. A. Watt, M.A., F.R.S.E., under the direction of the Council of the Scottish Meteorological Society, which appear in the Registrar-General's Quarterly Reports:—

The month of *January* was characterised by an exceptionally high mean pressure; a slightly high mean temperature, with a fractionally high mean daily range; a low mean humidity; a low mean rainfall, with about the average number of days with rain; a large excess of winds from west and north-west.

The mean barometric pressure of 30·131 inches was as much as 0·328 inch above the normal, and has been exceeded during the last fifty years only in 1880 and 1896. A deep depression skirted the North of Scotland on 1st and 2nd, and pressure was again low on 28th and 29th. But from 6th to 26th conditions were markedly anti-cyclonic, and on the morning of the 23rd pressure was above 31 inches over a large part of the country. A reading of 31·06 inches at Aberdeen has been exceeded there only by one of 31·11 inches on January 31st, 1902.

The mean temperature was 38°·2, or 0·9 above the normal, the days being 1°·0 and the nights 0°·7 above their respective averages. Many stations practically agreed with their normals, but the month

embraced a wide range of temperature conditions. On 1st the severe cold of the closing days of December had disappeared, except towards the north-east, Dundee and Aberdeen registering their minima on that day. Thereafter the month fell into two sharply contrasted periods, extremely mild weather prevailing until 21st, with a wintry spell during the last ten days of the month. In the Edinburgh district the mean temperature of the week ending on 26th was no less than 10° below that of the week ending on 12th. Highest temperatures fell, as a rule, between 5th and 7th, or between 12th and 15th, and lowest on 24th, 26th, or 31st. The extremes were 56°·0 at Clathick on 15th, and 9°·4 at Kingussie on 31st.

The mean rainfall was 2·88 inches, or 25 per cent. below the normal. There was a decided excess in Shetland, Orkney, and the northern part of the mainland, amounting to 54 per cent. at Dunrobin and 33 per cent. at Glencarron. But in most districts there was a well-marked shortage. Eastern districts from Montrose southwards, and also Dumfriesshire, had less than half their average rainfalls. In the North-West Highlands rain fell on every day from 1st to 16th, with very heavy falls from 11th to 14th. From 16th to 25th there was a dry spell in most districts, followed by several wet days. In Midlothian, East Lothian, and the Border Counties only nominal amounts were registered between 6th and 25th. Of heavy falls we may note:—At Dunrobin, 1·06 inch on 2nd; at Glencarron, 1·96 inch on 11th, 2·21 inches on 13th, and 1·64 inch on 27th; and at Lochbuie, 1·50 inch on 1st and 1·20 inch on 3rd.

The weather was rather stormy, especially in the north, from 1st to 3rd, and gales were general between 27th and 30th. Some snow or sleet fell early in the month, while the last ten days were of a wintry

TABLE X.—Monthly Mortality, Mean Temperature, and Mean Rainfall in Scotland during 1907, compared with the Mean of the Ten Years 1891–1900.

YEAR 1907.					1891–1900.

Note.—The total number of Deaths given in this Table is compiled from the Registrar-General's Quarterly Reports, which are based on Returns furnished by the Registrars, and does not exactly correspond with that given in other parts of this Report.

character, with a rather severe snowstorm on 29th. On 28th a sharp thunderstorm travelled from north-west to south-east, being noted at Glencarron at 10.45 a.m., at Fort-William at 11.20 a.m., at Rothesay at noon, and at Edinburgh at 0.54 p.m. Bright sunshine differed but little from the normal. Auroras observed in Shetland on 8th, 12th, 14th, and 15th.

The month of *February* was characterised by an average mean pressure; a low mean temperature, with a rather high mean daily range; a mean humidity about the average; an average mean rainfall; a large excess of winds from between west and north.

The mean pressure was 29.844 inches, being practically the normal. Pressure was high at the beginning and end of the month, the only important disturbance occurring on 19th and 20th, when a very deep depression crossed the north of Scotland. Range was large, the extremes at Leith being 30.587 inches on 5th and 28.530 inches on 19th.

The mean temperature was 36°·6, or 1°·6 below the normal, the days being 0°·9 and the nights 2°·3 below their respective averages. Temperature was lower than in January, clear skies promoting terrestrial radiation and causing low night readings. But though the month was almost continuously cold, extremely low temperatures were, as a rule, not recorded. The temperature defect was well marked in all districts, but especially in the Border Counties. Highest temperatures fell at some stations around 15th, but at most between 25th and 27th; lowest temperatures on 1st, but here and there between 4th and 6th, at Glencarron and Lairg on 14th, and in Orkney and Shetland on 22nd. Ground frosts were unusually frequent, occurring at Crathes on 26 days, and at Balmoral on 24. The extreme shade readings were 60°·0 at Crathes on 25th and 5°·0 at Balmoral on 1st.

The mean rainfall was 3.09 inches, being practically the normal. A general excess in north and west was balanced by a defect in east and south. Thus Lairg and Fort-Augustus had amounts more than 40 per cent. above the normal, whilst Dundee and Kelso had shortages of 50 per cent. The greater part of the month's rain fell between 7th and 11th (Dumfries 1.13 inch on 10th), and between 14th and 20th, some heavy falls occurring in west and north during the latter period. Glenquoich registered about 4½ inches from 15th to 17th, and we may note the following:—At Glencarron, about 1 inch on 14th, 15th, and 16th; at Fort-Augustus, over 1 inch on 16th and 18th; at Fort-William, 1.13 inch on 16th and 1.22 inch on 19th; and at Greenock, 1.23 inch on 16th.

From 19th to 21st severe gales from west and north-west prevailed. Snow was rather frequent, and snowstorms of considerable severity occurred at times, especially around 12th and 21st. Thunder in various districts on 15th, 17th, or 19th. Bright sunshine was largely in excess. Edinburgh with 125 hours, or 47 per cent. of the possible amount, was much sunnier than the south of England, *e.g.*, Bournemouth, 107 hours. A brilliant aurora was widely observed on 9th, whilst in Shetland displays were noted on 5th, 8th, 9th, 10th, 13th, and 19th.

The month of *March* was characterised by a high mean pressure; a high mean temperature, with a large mean daily range; a low mean humidity; a rather high mean rainfall; a large excess of westerly winds.

The mean pressure was 29·951 inches, or 0·142 inch above the normal. On 16th a deep depression crossed Scotland in a N.N.E. direction, and pressure was very irregular from 12th to 18th. Earlier in the month, from 4th to 9th, northern districts lay under the influence of depressions moving on an easterly track beyond our islands. From 20th onwards anticyclonic conditions prevailed. At Leith the sea-level extremes were 30·476 inches on 11th and 28·963 inches on 16th.

The mean temperature was 42°·1, or 1°·5 above the normal, the days being 2°·5 and the nights 0°·5 above their respective averages. The excess was everywhere well marked, and in most eastern districts the month was the mildest March since 1893, whilst in the west the month in 1905 was at least as mild. The only occurrence of cold weather lasting more than a day or so was from 8th to 12th, when low temperatures ruled both by day and night. On 9th the shade maximum at Balmoral rose to only 30°, whilst on the night of 11th the exposed minimum registered 27° of frost. Highest temperatures occurred towards the close of the month, when the days were unusually warm, the last week having in some districts a mean temperature as much as 8° above the normal. The shade extremes were 69°·0 at Broomlands on 29th, and 10°·0 at Balmoral on the night of 11th.

The mean rainfall was 3·48 inches, or 19 per cent. above the normal. In west and south, as in the Lothians and Fifeshire, there was a decided excess, amounting to 95 per cent. at Paisley, and to 60 per cent. or over at Poltalloch, Rothesay, Glasgow, and Drumlanrig. Towards north-east there was a shortage of about 30, and towards south-east of about 20 per cent. From 4th to 10th and from 12th to 19th there were very heavy rains in north-west and west, with heavy general falls on 16th. We may note:—At Glencarron, falls of 1 inch or over on 4th, 7th, and 14th; at Glenquoich, 2·20 inches on 8th and falls of more than 1 inch on 5th, 15th, 16th, and 18th; at Leadhills, 2·01 inches on 16th. The last ten days of the month were rainless, or all but so, over the greater part of the country.

Snow was general from 8th to 10th, lying to a considerable depth in places. Lighter falls of snow or hail on some later days. From 8th to 10th and from 16th to 18th the weather was of a stormy character. Thunder heard at Baltasound on 6th; a thunderstorm at Lairg on 17th. Bright sunshine was again abundant, the closing days of the month being exceptionally sunny. Auroras observed in Shetland on 10th, 11th, 21st, and 22nd; in Orkney on 9th. Of these displays, that on 21st was noted at various stations as far south as Edinburgh.

The month of *April* was characterised by a low mean pressure; a slightly low mean temperature, with a slightly low mean daily range; a slightly high mean rainfall; an excess of winds from east and north-east.

The mean pressure of 29·753 inches, or 0·130 inch below the normal,

was 0·2 inch below the mean for March. Pressure was rather irregular for the first half of the month, whilst later the fluctuations were less considerable. As a rule depressions affecting our area were of no great depth, but on the morning of the 6th the mercury fell below 29 inches in northern districts. At Leith the sea-level extremes were 30·251 inches on 25th and 29·179 inches on 7th.

The mean temperature was 43°·7, or 0°·4 below the normal, the nights being of average temperature, but the days 0°·7 below. The differences for the individual stations were nowhere great, a few reporting a trifling excess. In most districts the maximum fell on 2nd, the actual highest being 66°·0 at Inverness, but along the east coast from the Firth of Tay to Orkney the warmest day was between 21st and 23rd. The lowest shade temperature was 21°·0 at Wolfelee on 18th, minima mostly occurring about that date under the influence of northerly winds. At a good many stations the highest temperatures noted were lower than those for March, and at some this was true also of the minima.

The mean rainfall was 2·43 inches, or 7 per cent. above the normal. Distribution was rather irregular, and many of the stations differed but little from their averages. There were no areas of very deficient rainfall, whilst the largest excesses reported were 33 per cent. at Paisley, 36 at Lednathie, and 40 at Logie Coldstone. The wettest period was from 2nd to 10th, and in some districts fully two-thirds of the month's rainfall was registered between these dates. In all except eastern districts rain was frequent from 20th onwards, whilst over a large part of the country the period from 11th to 19th was rainless, or all but so. The heaviest daily amounts noted were 1·76 inch at Balmoral on 7th, an amount greater than the entire rainfall at that place for any of the first three months of the year, and falls of about 1 inch at Lednathie on 4th, at Stronvar on 5th, and at Leadhills and Kilmarnock on 6th.

The month was of a very changeable character, with touches of quite wintry weather, snow, sleet, or hail being experienced in most districts about 6th, 18th, or 26th. Thunder at Crieff and in west and south on 2nd, in south-east and at Cargen on 8th, at Buchlyvie, Glasgow, and Paisley on 10th, at Haddington on 26th and 27th, and in south on 27th. Bright sunshine not greatly different from the average. Auroras observed in the Hebrides on 14th, in Shetland on 17th, and at Balmoral on 19th.

The month of *May* was characterised by a low mean pressure; a low mean temperature, with a very low mean daily range; an extremely high mean rainfall, with a large number of days with rain; an excess of winds from north-east and east.

The mean pressure was 29·839 inches, or 0·105 inch below the normal. Depressions were rather numerous but of moderate depth, except at the beginning of the month, when a low pressure area of unusual depth for spring, and moving very slowly, travelled across Scotland. On 2nd over an entire area, and in the north of England and Ireland, the mercury fell below 29 inches. At Leith the sea-level extremes were 30·33 inches on 17th and 18th, and 28·73 inches on 2nd.

The mean temperature was 47°·5, or 1°·5 below the normal. The nights were of nearly average temperature, but the days deficient by

2°·6. The only interruptions to the generally cold character of the month occurred about 12th and 26th, nearly all stations having their maxima around one or other of these dates. On 26th Lairg reported 79°·0 and Fort-William 76°·7, but most stations failed to reach 70°·0, and the low day temperatures were notable. Thus at Aberdeen 60° was reached only on 11th, 13th, 14th, and 26th, and the maximum on 30th and 31st was as low as 45°. Lowest readings occurred on various dates, but generally early in the month, or between 17th and 19th, the actual lowest being 23°·0 at Lednathie on 2nd.

The mean rainfall of 3·96 inches, or 73 per cent. above the normal, has been exceeded during the last fifty years only in 1906. In the Orkneys, the extreme north of the mainland, and part of West Inverness-shire there was a slight deficiency, but elsewhere there was an excess, very heavy in most districts. Thus Montrose and Arbroath had about thrice their normal amounts, and extensive districts in the east at least double the average. In the Clyde area and most of the south of Scotland the excess was from 80 per cent. upwards. The greater part of the month's rains fell between 1st and 12th, 21st and 24th, and on 30th and 31st. On 23rd falls of considerably more than 1 inch occurred towards the north-east (1·89 inch at Logie Coldstone), and on 31st Dundee had 1·06 inch.

The weather was stormy on 2nd, with winds from south-west. Snow fell at Crieff on that day, and showers of sleet or hail were rather frequent in many districts during the month. Thunderstorms were rather frequent. These as a rule occurred on 8th towards east and north, and on 8th and 12th in south. The thunderstorm on 12th in southern districts was of great severity. Bright sunshine was very deficient except towards north-west and north. Baltasound (199 hours) and Oban (183 hours) averaged 2 hours a day more than Edinburgh (121 hours).

The month of *June* was characterised by a remarkably low mean pressure; a notably low mean temperature, with a very low mean daily range; an exceptionally high mean rainfall, with a notably large number of days with rain; a considerable excess of winds from a westerly quarter.

The mean pressure of 29·681 inches, or 0·265 inch below the normal, was decidedly the lowest mean pressure for June since 1860. Throughout the entire month the weather was under the influence of a constant succession of low pressure areas, range being very low and the absence of high readings remarkable. The extremes at Leith were 30·085 inches on 17th and 29·426 inches on 24th.

The mean temperature of 51°·1, or 3°·8 below the normal, was the lowest recorded for June for at least fifty years, and has been approached only in 1888. The temperature deficiency was everywhere well marked, and increased from east to west, the defect at most western stations ranging from 4° to 5°. The days were, on the mean, deficient by 5°·2 and the nights by 2°·4. At a good many stations the maximum was below that for May, and nearly everywhere the absence of high day temperatures was remarkable. The 9th, 11th, or 17th were generally the warmest days, Dumfries registering 76°·0 on 9th; but only one quarter of the stations reached 70°. Lowest temperatures fell as a rule on 4th. The actual lowest, however, was

29°·5 at Baltasound on 1st, but in west and south on 23rd or 25th. On 23rd Balmoral had a shade reading of 32°·0, and on 4th Lairg and Lednathie registered 32°·5.

The mean rainfall of 4·35 inches was as much as 73 per cent. above the normal. Returns from Kingussie and Braemar indicate a restricted area of comparatively low rainfall, but in most districts the excess was very heavy. Along the greater part of the East Coast from Wick to the Tay and for some distance inland most stations had more than twice their normal June amounts, and the excess in the south was also remarkable. Lairg, Glencarron, Buchlyvie, and Leadhills had only one rainless day, and many places only three or four such days. The month was notable for the persistency of the rainfall rather than for abnormally heavy individual falls; but we note amounts of over 1 inch in a day at Inverness on 1st, at Dumfries on 4th, at Glencarron on 19th, and at Gordon Castle on 24th. On the whole, the month appears to have been the wettest June since 1872, though in June 1897 the rainfall in eastern districts was at least as heavy.

Storms of thunder and hail were frequent, especially in east and south. Thus at Montrose thunder occurred on six days and at Duns on seven. The severest storms were between 9th and 13th and on 29th, that on the latter date being widespread, but not, apparently, experienced to the west of Paisley or north-west of the Grampians. The cold and wet character of the month was naturally associated with sunshine amounts much below the normal. Baltasound and Oban had less than half the amounts recorded in May. Fog was somewhat frequent from 5th to 16th, especially around the Orkneys and Shetlands.

The month of *July* was characterised by a rather high mean pressure; a low mean temperature, with a slightly low mean daily range; a rather low mean rainfall; a considerable excess of winds from between north-west and east.

The mean pressure was 29·976 inches, or 0·084 inch above the normal. From 10th to 21st the weather was controlled by an extensive high-pressure system, but at the beginning and end of the month conditions were very unsettled, the deepest depression occurring on 3rd and 4th. At Leith the extremes were 30·521 inches on 15th and 29·506 inches on 4th.

The mean temperature was 55°·4, or 1°·9 below the normal, the days being 2°·0 and the nights 1°·7 below their respective averages. The month proved, on the whole, the coldest July since 1902, the temperature defect being greatest in the eastern half of the country. The first week of the month appears to have been the coldest week experienced in July for a good many years, and some low day temperatures were reported, Lairg and Glencarron failing to reach 50° on 5th. Some high day temperatures occurred about the middle of the month, but on the east coast the reversion to cold weather was abrupt. Thus, at Leith the maximum on 16th was 81°·8, but on 19th only 59°·2. The highest shade temperatures were 87°·0 at Buchlyvie and 86°·3 at Lairg on 16th. Minima fell generally on 1st, 2nd, 7th, and 11th, the actual lowest being 35°·0 at Leadhills on 11th and 30th.

The mean rainfall was 2·44 inches, or 22 per cent. below the normal. Midlothian had about its average amount, but in general there was a well-marked shortage amounting to 40 per cent. and over in many districts. At Lerwick and Deerness the aggregate was but little over 1 inch. The heavy rains of June were prolonged until about July 13th, when an abrupt change took place in sympathy with the dominating high-pressure system above noted. A rainless spell of about 12 days' duration was followed by a recurrence of rainy weather from 26th onwards. The heaviest falls took place on 4th (0·77 inch at Edinburgh), on 7th, on 11th and 12th (1·92 inch at Lochbuie on 12th), and at the close of the month (1·08 inch at Dalkeith on 29th).

Sleet at Balmoral on 1st. Hail in north and north-east, and at Crieff and Leadhills on 1st; at Wolfelee on 5th; and Balruddery, Buchlyvie, and Paisley on 9th. Solar halos noted at Paisley on 14th, and at Drumlanrig on 21st. Thunderstorms at Kelso on 1st; at Wolfelee on 1st, 5th, and 28th; in South of Scotland on 21st; and in Lothians and Berwickshire on 29th. Thunder was heard at Duns on 8 days. Sunshine, as in May and June, was very deficient on the east coast. On the west the month was rather sunnier than usual, Glasgow with 156 hours registering 24 hours more than Edinburgh. Coast fog was frequent between 11th and 17th.

The month of *August* was characterised by a rather low mean pressure; an abnormally low mean temperature, with a slightly low mean daily range; a high mean rainfall, with a large number of days with rain; a decided excess of winds from between south-west and north-west.

The mean pressure was 29·799 inches, or 0·057 inch below the normal, the defect ranging from more than 0·1 inch over Shetland to a nominal amount in the south. Depressions were numerous, and the weather of the Scottish area was hardly ever under the control of a high-pressure system. At Leith the sea-level extremes were 30·226 inches on 21st and 29·455 inches on 10th.

The mean temperature was 53°·6, or 3°·0 below the normal, the days being 3°·3 and the nights 2°·7 below their respective averages. Taking Scotland as a whole, low day temperatures appear to have been unprecedented during at least 50 years, though in 1881, 1885, and 1902 the actual mean temperature of the month was as low, or almost so. The temperature defect was everywhere well marked, exceeding 4° at Fort-Augustus and Fort-William. There was an almost entire absence of seasonable warmth, and only seven stations had a maximum for the month as high as 70°, whilst there were days in many districts on which the thermometer failed to reach 60°. The highest readings reported were 73°·0 at Kilmarnock on 17th, and 71°·0 at Lairg on 22nd; but, as a rule, the warmest days were 4th, 5th, or between 8th and 12th. Lowest readings occurred on 2nd, or during the last week of the month, Leadhills reporting 32°·0 in shade on 30th, on which day Crathes registered 5° of frost in the open, and Balmoral 4°.

The mean rainfall was 4·61 inches, or 25 per cent. above the normal. To the north-east of the Grampians and towards the Borders there was a moderate deficiency, but in general there was an

excess which at many western stations amounted to more than 50 per cent. Glenquoich had more than 15 inches of rain, Lochbuie (Mull) more than 12, and Fort-William 10½. At Glencarron rain fell on 31 days, and at many stations on 27 or more. Lochbuie registered 2·15 inches on 8th, and falls of at least 1 inch on 10th, 24th, and 28th. The wettest period in the southern half of the country was from 11th to 15th, Glasgow having 1·32 inch on 11th. Towards the north-west, the heaviest falls occurred from 8th to 10th, around 19th, and during the last week of the month. The absence of heavy falls towards the north-east was noteworthy, the wettest day at King's College, Aberdeen, being 2nd, with only 0·26 inch.

Sleet and hail fell at Balmoral on 31st, hail at Dundee and Dalkeith on that day, and in Shetland on 20th and 24th. Thunder in the Orkneys and Mull on 11th, in some districts south of the Forth and Clyde on 12th, at Aberdeen on 6th, 18th, and 31st, at Duns on 15th, 16th, and 28th. Thunderstorms of any severity occurred only very locally. Solar halos noted at Baltasound on 3rd and at Paisley on 6th. Fog was of unimportant occurrence for a summer month. Sunshine was on the whole deficient, more so in the west than in the east, and very sunny days were of rare occurrence. Auroras observed in Shetland on 2nd and 7th.

The month of *September* was characterised by a high mean pressure; a rather high mean temperature, with a large mean daily range; a very low mean rainfall; a slight excess of winds from south-west and west.

The mean pressure was 30·046 inches, or 0·180 inch above the normal. Unsettled conditions early in the month were followed by a long period of high pressure, the barometer at sea-level at Leith remaining all but continuously above 30 inches from 7th to 23rd. The extremes at Leith were 30·549 inches on 21st and 29·434 inches on 2nd.

The mean temperature was 53°·5, or 0°·7 above the normal, the days being 1°·7 above and the nights 0°·3 below their respective averages. A good many stations practically agreed with their normals, and in Shetland there was a decided deficiency. Early in the month very low temperatures for the time of year occurred, many stations reporting shade readings below 32° on 3rd or 4th, the actual lowest being 27°·8 at Kingussie, whilst Balmoral had a temperature in the open as low as 21°. Thereafter until almost the end of the month mild conditions prevailed. Indeed the highest temperature of the month at Poltalloch occurred on 30th, that at Kingussie on 29th, and that at Fort-William and some stations in south-west and south on 28th. But, in general, the 10th was the warmest day, readings of 87°·0 at Lairg, 83°·2 at Loanhead (Logie Coldstone), and 80°·0 at Gordon Castle being the highest recorded at these places during the present year.

The mean rainfall was 1·47 inch, or 59 per cent. below the normal. In Shetland and at Leith there was only a slight deficiency, but in nearly all districts the shortage was very pronounced, and, taking the country as a whole, the month proved the driest September since 1894. Large areas received decidedly less than 1 inch of rain, and aggregates of more than 2 inches occurred only at some western stations and in Shetland. The wet weather of August was prolonged until 5th or 6th

of the month, Lochbuie having 1·25 inch on 2nd and Leith 1·02 inch on the same day. Rain was again fairly general on 11th, but thereafter, except towards north and north-west, an almost continuous dry spell prevailed until nearly the close of the month. At Dumfries, after 3rd, the month was rainless except for small falls on 11th and 30th, and there were considerable areas approximating to these conditions. At Baltasound (Shetland), at the other extreme, rain fell on 26 days.

Rather stormy weather was experienced towards the north on 2nd, 3rd, and 6th, whilst on 16th a gale was general round the coast from Tarbet Ness to Cape Wrath, and in the Orkneys and Shetlands. Thunderstorms of moderate severity occurred in west and south-west on 10th or 11th. A solar halo noted at Leith on 25th. Towards north-west, north-east, and south-east large amounts of sunshine were recorded. At Crathes on Deeside the large total of 194 hours represented 51 per cent. of the possible, and an average of $2\frac{1}{2}$ hours' sunshine per day more than in August and 3 hours per day more than in June; Edinburgh and Glasgow had about their normal amounts. During the last four or five days of the month dense fog prevailed almost continuously along the east coast; on the west, fog occurred more sporadically. An aurora was widely observed on 10th, and at Fort-William and Gordon Castle on 30th.

The month of *October* was characterised by an extremely low mean pressure; a rather high mean temperature, with a rather low mean daily range; a very high mean rainfall; a large excess of easterly winds.

The mean pressure of 29·611 inches was 0·203 inch below the normal, and the lowest mean recorded for October during the last fifty years, except in 1872 and 1903. Conditions were in complete contrast to those of September; there was a practically continuous succession of disturbances, and our area never lay under the influence of a high-pressure system. At Leith the sea-level extremes were 30·115 inches on 31st and 29·004 inches on 18th.

The mean temperature was 47°·4, or 0°·8 above the normal, the days being 0°·5 and the nights 1°·1 above their respective averages. As a rule, the temperature excess of the month was well marked. The maximum occurred at most stations between 4th and 6th, Gordon Castle reaching 70°·0 in shade on 5th, and Lairg and Haddington 66°·0 on the same day about this time, and towards the end of the month the weather was unusually warm for the time of year. Lowest temperatures occurred, as a rule, on 8th, but in west and south on 27th. The lowest shade readings reported were 20°·0 at Lednathie on 8th, 22°·0 at Kingussie on 15th, and 25°·5 at Lairg on 8th.

The mean rainfall was 5·62 inches, or 39 per cent. above the normal. The distribution was very irregular. Thus, towards the north-west and north there was a decided deficiency, considerable areas having less than half the normal. On the other hand, in north-east, east, and south there was a pronounced excess, which appears to have been relatively greatest in the Lothians, where several stations had as much as thrice the normal October rainfall. The aggregate of 7·90 inches at Edinburgh was an inch above any October rainfall for at least 100 years, the closest approach being October 1864 with 6·90 inches. In south and south-west, however, the month was less wet

than October 1903. On 15th a wet period of ten days culminated in a great rainstorm in eastern and southern districts. Blackford Hill Observatory, Edinburgh, registered 3·13 inches in 24 hours, Corstorphine 2·95 inches, and Glasgow 2·45 inches. On that day north-western districts were visited by only slight falls. Over a large part of the country the weather was almost continuously wet from 5th to 24th, with very heavy falls in various districts on 6th, 7th, 8th, 13th, 15th, and 17th.

Early in the month touches of wintry weather were experienced, whilst the heavy rains of 15th were accompanied by a severe thunderstorm in east and south-east. Wind of gale force was reported on the east coast on 17th, and on the west on 18th and 19th. Coast fog occurred at times in east and north. Sunshine was decidedly deficient. Auroras noted at Baltasound on 8th, 9th, 14th, 15th, and 27th, and rather widely on one or more of these days.

The month of *November* was characterised by a rather high mean pressure; a slightly high mean temperature, with a slightly high mean daily range; a rather low mean rainfall; and a nearly average distribution of winds.

The mean pressure of 29·895 inches was 0·061 inch above the normal, and nearly three-tenths of an inch above the mean for October. Pressure was high during the first three weeks, except on 12th and 13th, but from 26th to 28th conditions were very unsettled. At Leith the sea-level extremes were 30·484 inches on 30th, and 28·948 inches on 26th.

The mean temperature was 41°·5, or 0°·6 above the normal, the days being 0°·9 and the nights 0°·2 above their respective averages. Some inland and western stations showed a temperature deficiency, whilst towards the south-east there was a fairly well-marked excess. The first half of the month was decidedly mild, with highest temperatures in most districts on 4th, when the highest shade readings reported were 59°·7 at Leith, 59°·6 at Glasgow, and 59°·0 at Helensburgh. Thereafter conditions were more variable, with short spells of rather severe frost around 18th and 26th. The lowest shade readings reported were 15° at Balmoral on 26th, 18° at Kingussie on the same day, and 20° at Stronvar on 19th. At Balmoral the night temperatures fell below 30° on grass on 23 nights, at Crathes on 22 nights.

The mean rainfall was 3·15 inches, or 17 per cent. below the normal. In eastern districts there was a decided shortage, and Midlothian had only half its average rainfall. In the west a less well-marked deficiency prevailed, and a few stations reported a slight excess. Most districts had a very heavy fall on at least one day of the month, but the Edinburgh area was in this respect exceptional, Leith not having as much as a quarter of an inch on any one day. Perhaps the heaviest general fall occurred on 26th, on which day some places, such as Dundee and Perth, registered more than half their totals for the entire month. Between 10th and 12th, on 16th and on 22nd, very heavy falls occurred in various districts. Lochbuie (Mull) had amounts of 1 inch or over on as many as 5 days, Glenquoich on 4 days, Bendamph, Fort-William, and Stronvar on 2 days. The heaviest falls reported were 2½ inches at Glenquoich on 13th, 1·80

inch at Bendamph (Loch Torridon) on 21st, and 1.78 inch at Baltasound (Shetland) on 22nd. In eastern districts the well-defined shortage was in striking contrast to the heavy rains of October.

Though fine spells occurred, the general conditions of the month may be described as of a very changeable character. On the afternoon of the 12th a rapidly travelling storm-centre affected western districts especially. On 21st and 22nd a south-westerly gale was experienced in all districts, and on 26th a gale from south-east was of considerable severity. Wintry conditions prevailed around 18th and 26th, with snow and sleet in many districts. Thunderstorms occurred in Shetland on 8th; on 12th at Lairg, and over a large part of western Scotland; at Leadhills on 13th and 14th. Auroras noted at Baltasound on 3rd, 5th, 6th, 7th, 11th, 13th, and 29th; at Fort-Augustus on 5th and 10th. Sunshine records in general differed little from the normal, but there was a considerable excess towards north-west. But little coast fog was experienced except in the Firth of Forth. On 26th, however, rather dense land fog prevailed, and the Upper Clyde was affected.

The month of *December* was characterised by a low mean pressure; a slightly high mean temperature, with a rather low mean daily range; a rather high mean rainfall; and a large excess of south-easterly winds.

The mean pressure was 29.628 inches, or 0.152 inch below the normal. Considerable fluctuations occurred during the first two weeks, but from very low readings on 13th there was a rapid recovery, with high readings during the rest of the month except from 20th to 22nd. At Leith the sea-level extremes were 30.339 inches on 24th and 28.631 inches on 13th.

The mean temperature was 38°·5, or 0°·4 above the normal. Many stations had practically their average temperatures, whilst some showed a deficiency. As regards the whole country, the nights were 0°·9 above the average, and the days practically normal. In several districts the 1st was the coldest day, and, speaking very generally, it may be said that the first week of the month was cold, the second mild, and the third very mild, though at a few stations in the West lowest temperatures were reported on the night of the 14th. Highest temperatures as a rule occurred on 17th. During the last week or ten days conditions were controlled by winds from some easterly point, and cold weather was experienced. The shade temperatures ranged from 54°·2 at Fort-William on 17th to 10° at Balmoral on 30th.

The mean rainfall was 4.67 inches, or 13 per cent. above the normal. In most districts to the east and south of the Grampians there was a well-defined excess, amounting to 70 per cent. at Edinburgh, and most pronounced along a belt stretching from the Forth to the Clyde. Towards North and North-West there was as a rule a shortage, though some stations had a slight excess. In several western and southern districts rain fell on every day from 1st to 22nd, whilst towards north and east there were occasional fine days. Between 4th and 11th we note falls exceeding 1 inch in 24 hours at Glencarron on 4th and 10th; at Glenquoich on 5th, 10th, and 11th; at Fort-William on 9th and 10th; at Lochbuie on 4th, 7th, and 9th;

at Rothesay on 10th; the greatest of these falls being 2·10 inches at Glenquoich on 11th. On 13th a severe rainstorm was general in eastern districts, 1·40 inch being registered at Logie Coldstone, and about 1·20 inch at Edinburgh and West Linton. On 20th heavy falls were again widespread, with 1 inch at Paisley, Cally, and Dumfries. The last eight days were rainless or all but so in many districts.

The heavy rains of the 13th were the accompaniment of a gale from west and north-west, whilst on 26th a severe gale from south-east occurred. During the last week of the month weather of a wintry type prevailed, with snow on several days, but in most districts to no great depth. Thunderstorms reported at Kyleakin and Corran on 4th, Cargen on 6th, Cally on 7th, and Colmonell on 9th. Lightning in several districts on 4th, 5th, or 6th. At the stations with sunshine recorders the amounts did not differ greatly from the normal except at Inverness, which had twice the average. Land fog, occasionally very dense, was frequent towards the end of the month. Auroras observed in Shetland on 7th, 13th, 28th; at Inverness on 10th; at Deerness and Balmoral on 11th.

I have the honour to be,

SIR,

Your most obedient Servant,

JAMES C. DUNLOP.

GENERAL REGISTRY OFFICE OF BIRTHS, &c.,
EDINBURGH, 3rd June 1909.

APPENDIX TABLES.

TABLE 1.—Population estimated to the middle of each year; with the Number of Births, Deaths, and Marriages registered in Scotland during each of the Years 1855 to 1907, and their Proportion to the Population; also the Excess of Births over Deaths, the Illegitimate Births, and their Proportion to the Total Births.

YEAR	Estimated Population.	BIRTHS.		DEATHS.	MARRIAGES.	Excess of Births over Deaths.	Rate per 1000 of Population.			Percent. of Illegit. to Total Births.
		Total.	Illegit.				Births.	Deaths.	Marriages.	
1855	2,978,065	93,349	7,357	62,004	19,680	31,345	31·346	20·820	6·608	7·88

N.B.—Districts containing Parliamentary and Royal Burghs are printed in capitals, thus:—EDINBURGH. Districts containing Police Burghs or Towns of 2000 Inhabitants and upwards are printed in small capitals, thus:—CARLUKE.

An asterisk "*" is prefixed to those Districts which have different names from the Parishes in which they are situated, or which comprise more, or parts of more, than one Parish. The component parts of these Districts will be found at page 534.

A dagger "+" is prefixed to those Districts which consist of only a part of the Civil Parish of the same name.

CONSTITUTION OF THE DISTRICTS DISTINGUISHED IN THE PRECEDING TABLES
BY AN ASTERISK (*).

No.	Districts.	Component Parts (Parishes).
2. Orkney.		
13	Birsay	Part of Harray and Birsay.
14	Deerness	Part of St Andrews and Deerness.
18	Harray	Part of Harray and Birsay.
22	North Ronaldshay	Part of Cross and Burness.
25	St Andrews	Part of St Andrews and Deerness.
26	Sanday	Lady, and part of Cross and Burness.
3. Caithness.		
37b	Keiss	Parts of Canisbay and Wick.
5. Ross and Cromarty.		
58	Applecross	(1) Part of Applecross; (2) Remainder of Applecross and part of Gairloch.
59b	Carnoch	Parts of Contin and Urray.
86b	Carloway	Parts of Barvas and Uig.
87	Lochs	Lochs, and part of Uig.
6. Inverness.		
92b	Cannich	Parts of Kilmorack and Kiltarlity.
112	Kilmuir	(1) Part of Kilmuir; (2) Remainder of Kilmuir, and part of Snizort.
8. Elgin.		
135	Elgin.	Elgin, and parts of New Spynie and St Andrews-Ihanbryde.
9. Banff.		
152	Enzie	Parts of Bellie and Rathven.
155b	Glenrinnnes	Parts of Aberlour and Mortlach.
167	Seafield	Parts of Cullen and Rathven.
10. Aberdeen.		
171b	Ardallie	Parts of Cruden, Ellon, Longside, and Old Deer.
210b	Kininmonth	Parts of Crimond, Longside, Lonmay, Old Deer, and Strichen.
217	Logie Coldstone and Cromar	Logie Coldstone, and part of Glenmuick.
222b	Millbex	Parts of Fyvie and Monquhitter.
227b	New Pitsligo	Parts of Aberdour, New Deer, Strichen, and Tyrie.
231	Peterculter	(1) Parts of Aberdeen and Peterculter; (2) Remainder of Peterculter.
237b	Savoch	Parts of Ellon, New Deer, Old Deer, and Tarves.
249b	Ythan Wells	Parts of Auchterless and Fergie.
11. Kincardine.		
266	Nigg	Nigg, and part of Aberdeen.
12. Forfar.		
282	Dundee	Dundee Combination, and part of Mains and Strathmartine.
294b	Kilry	Parts of Glenisla and Lintrathen.
13. Perth.		
324	Aberfeldy	Parts of Dull, Kenmore, and Logierait.
330	Auchtergaven	Parts of Auchtergaven and Logiealmond.
331	Balquhider	Balquhider, and part of Comrie.
344	Dowally	Part of Dunkeld and Dowally.
349	Dunkeld	Part of Dunkeld and Dowally.
355b	Foss	Parts of Blair-Athol and Dull.
361	Killin	Parts of Kenmore and Killin.
375	Logiealmond	Parts of Logiealmond, Little Dunkeld, and Methven.
379	Meigle	Meigle, and part of Coupar-Angus.
386b	Persie	Parts of Alyth, Blairgowrie, and Kirkmichael.
387	Perth	Perth, and part of Kinnoull.
393b	Stanley	Parts of Auchtergaven, Kinclaven, and Redgorton.
394b	Strathfillan	Part of Killin.
394c	Tenandry	Parts of Blair-Athol and Moulin.
14. Fife.		
402	Anstruther-Easter	Anstruther-Easter, and part of Kilrenny.
417	Crail	Part of Crail, and May Island.
423	Dunbog	Dunbog, and part of Flisk.
425	Dunino	Dunino, and part of Crail.
442	Kirkcaldy and Abbotshall	Part of Kirkcaldy and Dysart.
457b	Thornton	Part of Kirkcaldy and Dysart and of Markinch.
17. Stirling.		
473	Bonnybridge	Parts of Denny, Dunipace, and Falkirk.
488	St Ninians	Parts of St Ninians and Stirling.
490	Stirling	Parts of St Ninians and Stirling.

CONSTITUTION OF THE DISTRICTS—*continued.*

No.	Districts.	Component Parts (Parishes).
18. Dumbarton.		
496	Dumbarton . . .	Dumbarton, and parts of Cardross and Old Kilpatrick.
19. Argyll.		
504	Ardochattan . . .	Part of Ardochattan and Muckairn.
505	Ardnamurchan . . .	(1) Parts of Ardnamurchan and of Arisaig and Meidart.
506	Ballachulish, etc. . .	Parts of Kilmallie and Ardgour.
509	Cumlodden and Minard . .	Parts of Glassary and Inveraray.
515	Kilbrandon and Kilchattan .	Kilbrandon and Kilchattan, and part of Jura.
517	Kilchrenan, etc. . .	(1) Parts of Kilchrenan and Dalavich, and Glenorchy and Inishail; (2) Remainder of Kilchrenan and Dalavich.
520	Kilmallie . . .	Parts of Kilmallie and Ardgour.
525	Lismore . . .	Lismore and Appin, and part of Ardgour.
526	Lochgilhead . . .	Parts of Glassary and South Knapdale.
529	Muckairn . . .	Parts of Ardochattan and Muckairn, and Glenorchy and Inishail.
535	Tarbert . . .	Parts of Kilcalmonell, Saddell and Skipness, and South Knapdale.
536	Bowmore (or Kilarrow) . .	Part of Kilarrow and Kilmeny.
543	Kilmeny . . .	Part of Kilarrow and Kilmeny.
545	Kinlochspelve . . .	Part of Pennygown and Torosay.
547	Portnahaven . . .	Part of Kilchoman.
548	Salen . . .	Parts of Kilninian and Kilmore, and Pennygown and Torosay.
549	Tobermory . . .	Part of Kilninian and Kilmore.
550	Torosay . . .	Part of Pennygown and Torosay.
20. Bute.		
556	Lochranza . . .	Parts of Kilbride and Kilmory.
21. Renfrew.		
550b	Bridge-of-Weir . . .	Parts of Houston and Killellan, and of Kilbarchan.
572	Neilston . . .	(1) Part of Neilston; (2) Remainder of Neilston, and part of Paisley.
22. Ayr.		
576	Ardrossan . . .	(1) Parts of Ardrossan and West Kilbride; (2) Remainder of Ardrossan.
578	Ayr (Alloway) . . .	Parts of Ayr and Maybole.
584b	Crosshill . . .	Parts of Kirkmichael, Kirkoswald, and Maybole.
595	Irvine . . .	Irvine, and part of Dundonald.
603	Loudoun (Darvel) . . .	Parts of Loudoun and Galston.
610b	Patna . . .	Parts of Dalnellington, Dalrymple, Kirkmichael, and Straiton.
23. Lanark.		
622	Barony . . .	Part of Glasgow.
626a	Cadder (Eastern District) .	Parts of Cadder and Glasgow.
626b	Calderhead . . .	Parts of Cambusnethan and Shotts.
644	Glasgow . . .	Parts of Glasgow, Govan Combination, and Rutherglen.
25. Edinburgh.		
685	Edinburgh . . .	Parts of Edinburgh and Colinton.
692	Leith . . .	Leith, and part of Edinburgh.
695b	New Craighall . . .	Parts of Inveresk and Liberton.
698b	Stobhill . . .	Parts of Borthwick, Cockpen, and Newbattle.
29. Selkirk.		
774a	Caddonfoot . . .	Caddonfoot, and part of Innerleithen.
30. Roxburgh.		
787b	Edgerston . . .	Parts of Jedburgh and Southdean.
31. Dumfries.		
813b	Brydekirk . . .	Parts of Annan, Cummertrees, and Hoddum.
830	Holywood . . .	Holywood, and part of Terregles.
853b	Wanlockhead . . .	Part of Sanquhar.
32. Kirkcudbright.		
857b	Bargrennan . . .	Parts of Minnigaff and Penninghame.
862	Corsockbridge . . .	Parts of Balmaclellan, Kirkpatrick-Durham and Parton.
864	Dalbeattie . . .	Part of Urr.
33. Wigtown.		
899	Stranraer . . .	Stranraer, and parts of Inch and Leswalt.

LIST of REGISTRATION DISTRICTS which include BURGHS, or TOWNS of 2000 Inhabitants and upwards, or *parts thereof*, bearing a different name from the District in which they are situated.

* The actual number of Districts is 1073—many Parishes and Burghs having been divided into two or more Districts for the purpose of Registration. Thus Edinburgh and Glasgow, to each of which only a single number is assigned in the Tables, consist of 7 and 13 Districts respectively. In forming the alphabetical arrangement the principle adopted has been to place *compound* names in the order in which they are pronounced.
